ISO/IEC 14543-4-2:2008-05 (E)

Information technology_- Home electronic system (HES) architecture_- Part_4-2: Communication layers_- Transport, network and general parts of data link layer for network enhanced control devices of HES Class_1

CONTENTS

FOREWORD 4
INTRODUCTION 5
1 Scope 6
2 Normative references 6
3 Terms, definitions and abbreviations 7
3.1 Terms and definitions 7
3.2 Abbreviations 9
4 Conformance 9
5 Frame format of communication layers 10
6 Requirements for the physical layer and independent data link layer 10
6.1 Requirements for the physical layer 10
6.2 Functions of the data link layer 11
6.3 Possible media and their impact on layer-2 11
6.4 Data link layer services 11
6.4.1 Data link header 11
6.4.2 Data link address 12
6.4.3 Application data counter 15
6.4.4 Data link split frames 15
6.4.5 Data link data counter 16
6.5 Protocol difference absorption processing block 16
6.5.1 Overview 16
6.5.2 Message receipt/assembly processing 17
6.5.3 Message splitting/transmission processing 17
6.5.4 Address conversion processing 17
6.5.5 Communications type conversion processing 18
6.5.6 Common lower-layer communications interface processing 18
7 Requirements for the network layer 19
7.1 Overview 19
7.2 Received message determination processing 19
7.2.1 Overview 19
7.2.2 Received message identification processing specifications for nodes without the data link router function 19
7.2.3 Specifications for the received message identification processing for data link routers 20
7.3 Routing processing 21
7.3.1 Overview 21
7.3.2 Routing processing for nodes without the data link router function 21
7.3.3 Routing processing for data link routers 21
7.4 Send message creation/management processing 24
8 Requirements for the transport layer 24
Annex A (informative) API functions 25
A.1 API function for application layer 25
A.2 API functions for individual lower-layer communications interface 25
A.2.1 General 25

A.2.2 List of individual low-layer communication interface functions 25
A.2.3 Individual lower-layer communication interface detail specifications 26
A.2.4 Initial Setting Information Specifications 49
Bibliography 52

Figure 1 – Relationship between the protocol of ISO/IEC 14543-4 and OSI reference model 6
Figure 2 – Data link frame format of communication layers 10
Figure 3 – Configuration of DHD 11
