

ISO/IEC 14543-4-2:2008-05 (E)

Information technology_ - Home electronic system (HES) architecture_ - Part_4-2: Communication layers_ - Transport, network and general parts of data link layer for network enhanced control devices of HES Class_1

CONTENTS

- FOREWORD 4
- INTRODUCTION 5
- 1 Scope 6
- 2 Normative references 6
- 3 Terms, definitions and abbreviations 7
 - 3.1 Terms and definitions 7
 - 3.2 Abbreviations 9
- 4 Conformance 9
- 5 Frame format of communication layers 10
- 6 Requirements for the physical layer and independent data link layer 10
 - 6.1 Requirements for the physical layer 10
 - 6.2 Functions of the data link layer 11
 - 6.3 Possible media and their impact on layer-2 11
 - 6.4 Data link layer services 11
 - 6.4.1 Data link header 11
 - 6.4.2 Data link address 12
 - 6.4.3 Application data counter 15
 - 6.4.4 Data link split frames 15
 - 6.4.5 Data link data counter 16
 - 6.5 Protocol difference absorption processing block 16
 - 6.5.1 Overview 16
 - 6.5.2 Message receipt/assembly processing 17
 - 6.5.3 Message splitting/transmission processing 17
 - 6.5.4 Address conversion processing 17
 - 6.5.5 Communications type conversion processing 18
 - 6.5.6 Common lower-layer communications interface processing 18
- 7 Requirements for the network layer 19
 - 7.1 Overview 19
 - 7.2 Received message determination processing 19
 - 7.2.1 Overview 19
 - 7.2.2 Received message identification processing specifications for nodes without the data link router function 19
 - 7.2.3 Specifications for the received message identification processing for data link routers 20
 - 7.3 Routing processing 21
 - 7.3.1 Overview 21
 - 7.3.2 Routing processing for nodes without the data link router function 21
 - 7.3.3 Routing processing for data link routers 21
 - 7.4 Send message creation/management processing 24
- 8 Requirements for the transport layer 24
- Annex A (informative) API functions 25
 - A.1 API function for application layer 25
 - A.2 API functions for individual lower-layer communications interface 25
 - A.2.1 General 25

A.2.2 List of individual low-layer communication interface functions	25
A.2.3 Individual lower-layer communication interface detail specifications	26
A.2.4 Initial Setting Information Specifications	49
Bibliography.....	52
Figure 1 – Relationship between the protocol of ISO/IEC 14543-4 and OSI reference model	6
Figure 2 – Data link frame format of communication layers	10
Figure 3 – Configuration of DHD	11
Figure 4 – Configuration of SDLA and DDLA for individual address.....	12
Figure 5 – DDLA (broadcast-stipulated) address configuration.....	13
Figure 6 – Broadcast target requirement code	14
Figure 7 – Node group requirement bit specifications.....	15
Figure 8 – Format for protocol difference absorption processing section	15
Figure 9 – Relationship with upper-layer messages	16
Figure 10 – Configuration of DDC	16
Figure 11 – Subnet connections.....	22
Table 1 – Number of hop counts	12
Table 2 – NetID codes	13
Table 3 – DDLA (broadcast-stipulated) address configuration.....	14
Table A.1 – List of individual low-layer communication interface functions	25
Table A.2 – Node address description map.....	47
