

# ISO/IEC 14543-4-2:2008-05 (E)

## Information technology\_ - Home electronic system (HES) architecture\_ - Part\_4-2: Communication layers\_ - Transport, network and general parts of data link layer for network enhanced control devices of HES Class\_1

---

### CONTENTS

FOREWORD.....	4
INTRODUCTION .....	5
1 Scope.....	6
2 Normative references.....	6
3 Terms, definitions and abbreviations .....	7
3.1 Terms and definitions.....	7
3.2 Abbreviations .....	9
4 Conformance .....	9
5 Frame format of communication layers.....	10
6 Requirements for the physical layer and independent data link layer.....	10
6.1 Requirements for the physical layer .....	10
6.2 Functions of the data link layer .....	11
6.3 Possible media and their impact on layer-2.....	11
6.4 Data link layer services .....	11
6.4.1 Data link header .....	11
6.4.2 Data link address.....	12
6.4.3 Application data counter .....	15
6.4.4 Data link split frames.....	15
6.4.5 Data link data counter .....	16
6.5 Protocol difference absorption processing block .....	16
6.5.1 Overview .....	16
6.5.2 Message receipt/assembly processing .....	17
6.5.3 Message splitting/transmission processing.....	17
6.5.4 Address conversion processing.....	17
6.5.5 Communications type conversion processing.....	18
6.5.6 Common lower-layer communications interface processing .....	18
7 Requirements for the network layer.....	19
7.1 Overview .....	19
7.2 Received message determination processing .....	19
7.2.1 Overview .....	19
7.2.2 Received message identification processing specifications for nodes without the data link router function .....	19
7.2.3 Specifications for the received message identification processing for data link routers.....	20
7.3 Routing processing.....	21
7.3.1 Overview .....	21
7.3.2 Routing processing for nodes without the data link router function.....	21
7.3.3 Routing processing for data link routers.....	21
7.4 Send message creation/management processing .....	24
8 Requirements for the transport layer .....	24
Annex A (informative) API functions.....	25
A.1 API function for application layer .....	25
A.2 API functions for individual lower-layer communications interface.....	25
A.2.1 General .....	25

A.2.2 List of individual low-layer communication interface functions .....	25
A.2.3 Individual lower-layer communication interface detail specifications .....	26
A.2.4 Initial Setting Information Specifications .....	49
Bibliography.....	52
Figure 1 – Relationship between the protocol of ISO/IEC 14543-4 and OSI reference model .....	6
Figure 2 – Data link frame format of communication layers .....	10
Figure 3 – Configuration of DHD .....	11
Figure 4 – Configuration of SDLA and DDLA for individual address.....	12
Figure 5 – DDLA (broadcast-stipulated) address configuration.....	13
Figure 6 – Broadcast target requirement code .....	14
Figure 7 – Node group requirement bit specifications.....	15
Figure 8 – Format for protocol difference absorption processing section .....	15
Figure 9 – Relationship with upper-layer messages .....	16
Figure 10 – Configuration of DDC .....	16
Figure 11 – Subnet connections.....	22
Table 1 – Number of hop counts .....	12
Table 2 – NetID codes .....	13
Table 3 – DDLA (broadcast-stipulated) address configuration.....	14
Table A.1 – List of individual low-layer communication interface functions .....	25
Table A.2 – Node address description map.....	47
