

# ISO/IEC 14543-5-3:2012-02 (E)

## Information technology - Home electronic system (HES) architecture - Part 5-3: Intelligent grouping and resource sharing for HES Class 2 and Class 3 - Basic application

---

<b>Contents</b>	<b>Page</b>
FOREWORD.....	3
INTRODUCTION.....	4
1 Scope.....	5
2 Normative references .....	5
3 Terms, definitions and abbreviations .....	6
3.1 Terms and definitions .....	6
3.2 Abbreviations .....	6
4 Conformance.....	7
5 Overview .....	7
5.1 Summary.....	7
5.2 Design criteria .....	8
5.2.1 Relationship between basic application and IGRS .....	8
5.2.2 Relationship between basic application and transport protocol .....	8
5.2.3 Relationship between basic application and existing file sharing system.....	8
5.2.4 Relationship between basic application and file format .....	8
5.2.5 Basic application interaction model.....	8
5.2.6 Design principle.....	9
5.3 Explanation remarks.....	10
6 Digital media forwarding, storage and playback system .....	10
6.1 Overview .....	10
6.2 Media interaction flow selection.....	11
6.3 Specific description of digital media forwarding, storage and playback system .....	12
6.4 Software profile of digital media forwarding, storage and playback system .....	14
6.5 Software interfaces .....	16
6.6 Hardware interfaces .....	16
6.6.1 Network interfaces.....	16
6.6.2 Media Client interface.....	17
Bibliography.....	18
Figure 1 – IGRS application interaction model .....	9
Figure 2 – IGRS TV application scenario .....	11
Figure 3 – Media interaction model .....	12
Figure 4 – Software profile of digital media forwarding, storage and playback system .....	16
Table 1 – Protocol conformance.....	12
Table 2 – Function description .....	13
Table 3 – Media format supported.....	14
Table 4 – Network interfaces .....	17
Table 5 – Media Client interfaces.....	17
