FOREWORD 6
INTRODUCTION 7
1 Scope 8
2 Normative references 8
3 Terms, definitions, abbreviations and conventions 8
3.1 Terms and definitions 8
3.2 Abbreviations 11
3.3 Conventions 11
4 Conformance 11
5 IGRS service overview 12
6 Definition of service type identifier 12
7 Standard service type list 13
8 Basic service type specification 15
8.1 Content index service 15
8.1.1 Overview 15
8.1.2 Content index service type 15
8.1.3 Content index service attribute 15
8.1.4 Data type of content index service 15
8.1.5 Invocation interface set of content index service 17
8.1.6 Content index service error code definition 26
8.2 Connection management service 26
8.2.1 Overview 26
8.2.2 Connection management service type 26
8.2.3 Reference flow of connection management service interface invocation 27
8.2.4 Connection management service attribute 27
8.2.5 Connection management service data type 28
8.2.6 Connection management service invocation interface set 28
8.2.7 Content management service error code definition 31
8.3 Media server transport management service 31
8.3.1 Overview 31
8.3.2 Media server transport management service type 31
8.3.3 Reference flow of media server transport management service interface invocation 31
8.3.4 Media server transport management service attribute 32
8.3.5 Media server transport management service data type 32
8.3.6 Media server transport management service invocation interface set 33
8.3.7 Media server transport management service error code definition 38
8.4 Media client transport management service 38
8.4.1 Overview 38
8.4.2 Media client transport management service type 39
8.4.3 Reference flow of media client transport management service interface invocation 39
8.4.4 Media client transport management service attribute 39
8.4.5 Media client transport management service data type 40

8.4.6 Media client transport management service invocation interface set 42
8.4.7 Media client transport management service error code definition 49
8.5 Rendering management service 49
8.5.1 Overview 49
8.5.2 Rendering management service type 49
8.5.3 Rendering management service attribute 49
8.5.4 Rendering management service data type 49
8.5.5 Rendering management service invocation interface set 50
8.5.6 Rendering management service error code definition 58
8.6 File access management service 58
8.6.1 Overview 58
8.6.2 File access managemet service type 58
8.6.3 Reference flow of FAMS interface invocation 59
8.6.4 File access management service attribute 60
8.6.5 File access management service data type 60
8.6.6 File access management service invocation interface set 61
8.6.7 File access management service error codes definition 72
8.7 File connection management service 72
8.7.1 Overview 72
8.7.2 File connection management service type 72
8.7.3 Reference flow of file connection management service interface invocation 73
8.7.4 File connection management service attribute 73
8.7.5 File connection management service data type 74
8.7.6 File connection management service invocation inteface set 74
8.7.7 File connection management service error codes definition 76
9 Back channel message TCP service 76
9.1 Overview of Back channel message 76
9.2 Interaction flow of back channel message TCP service in audio/video playback application 77
9.3 Interaction flow of back channel message TCP service in an audio/video multicast playback application 77
9.4 BCM request message format definition 78
9.4.1 General 78
9.4.2 Connection management message 78
9.4.3 Content selection message 79
9.4.4 Transport control message 79
9.5 BCM response message format definition 80
Annex A (normative) Content representation framework of an IGRS AV content directory 82
A.1 Overview 82
A.2 IGRS metadata specification 83
A.2.1 IGRS metadata definition 83
A.2.2 Metadata of item object 84
A.2.3 Metadata of container object 88
A.2.4 Interface for vendor defined metadata 92
A.2.5 Extension point for the next version’s metadata definition 92
Annex B (normative) Specific description of metadata definitions 94
B.1 Basic metadata of item objects 94

B.2 Metadata of a specific item object 99
B.3 Basic metadata of the container object 109
B.4 Metadata of specific container object 110
Annex C (normative) Specific description of data type generation rules 114
C.1 Type_ObjectId 114
C.2 Type_ContentList 114
C.3 Type_FilterRule 115
C.4 Type_SortRule 115
C.5 Type_URI 116
C.6 Type_MediaFormat 116
C.7 Type_UserList 116
C.8 Type_ProtocolInfo 116
C.9 Type_MediaFormatList 117
C.10 Type_StorageMediumName 117
C.11 Type_TransportURI 117
C.12 Type_ItemList 118
C.13 Type_DisplayWindowInfo 118
C.14 Type_ObjectId in FAMS 119
C.15 ObjectType 119
Annex D (normative) Service type message format 120
D.1 Universal message format for IGRS service invocation 120
D.2 Content index service 127
D.3 Connection management service 139
D.4 Media server transport management service 143
D.5 Media client transport management service 154
D.6 Rendering management service 167
D.7 File access management service 182
D.8 File connection management service 194
Annex E (normative) IGRS XML schema files 197
E.1 igrs-cis-dt.xsd 197
E.2 igrs-cis-framework.xsd 197
E.3 igrs-cis-metadata-base.xsd 198
E.4 igrs-cis-metadata-container.xsd 200
E.5 igrs-cis-metadata-item.xsd 203
Annex F (normative) Connection management service description.wsdl 211
Annex G (normative) Content index service description.wsdl 217
Annex H (normative) Media client transport management service description.wsdl 234
Annex I (normative) Media server transport management service description.wsdl 251
Annex J (normative) Rendering management service description.wsdl 265
Annex K (informative) XML string example 285
