

# ISO/IEC 30100-2:2016-04 (E)

## Information technology - Home network resource management - Part 2: Architecture

### CONTENTS

- FOREWORD..... 4
- INTRODUCTION..... 5
- 1 Scope..... 6
- 2 Normative references..... 6
- 3 Terms, definitions and abbreviations ..... 7
  - 3.1 Terms and definitions ..... 7
  - 3.2 Abbreviations ..... 9
  - 3.3 Conventions ..... 10
- 4 Conformance ..... 10
- 5 Home network resource management ..... 10
  - 5.1 Information resource categories ..... 10
  - 5.2 Architecture ..... 11
  - 5.3 Resource information provider ..... 13
  - 5.4 Home resource management process ..... 14
  - 5.5 Management application..... 14
  - 5.6 Interface ..... 15
- 6 Home resource model..... 16
  - 6.1 Home resource model ..... 16
  - 6.2 Home resource object ..... 16
    - 6.2.1 Domain, class and resource object ..... 16
    - 6.2.2 Resource object structure ..... 19
  - 6.3 Domain-specific information ..... 19
    - 6.3.1 General..... 19
    - 6.3.2 Device specific information ..... 20
    - 6.3.3 Network specific information ..... 20
    - 6.3.4 Physical space specific information..... 20
    - 6.3.5 Service specific information ..... 20
  - 6.4 Home resource relation object ..... 21
    - 6.4.1 Definition ..... 21
    - 6.4.2 BNF notation of resource relation object ..... 22
  - 6.5 Miscellaneous ..... 23
    - 6.5.1 Relationship generation methods ..... 23
    - 6.5.2 Common policy ..... 23
    - 6.5.3 Privacy..... 23
- 7 Home network resource information modeling ..... 24
  - 7.1 Overview..... 24
  - 7.2 Device-specific information modelling ..... 24
  - 7.3 Network specific information ..... 101
  - 7.4 Physical space-specific information modelling ..... 116
  - 7.5 Service-Specific Information modelling ..... 133

Annex A (informative) Implementation of IWML (example) .....	189
A.1 Overview.....	189
A.2 IWML.....	189
A.2.1 General.....	189
A.2.2 IWML: Device description schema .....	189
Annex B (informative) Security and privacy model (examples).....	192
B.1 Overview.....	192
B.2 Security and Privacy model .....	192
B.2.1 General.....	192
B.2.2 Access control: XACML .....	192
B.2.3 Encryption: XML encryption .....	193
B.2.4 Signature: XML signature .....	193
Annex C (informative) Implementation of home resource model (example) .....	194
C.1 Overview.....	194
C.2 Resource types of resource object.....	194
C.2.1 General.....	194
C.2.2 Resource type of device domain .....	194
C.2.3 Resource type of network domain .....	195
C.2.4 Resource type of service domain .....	195
C.2.5 Resource type of physical space domain .....	196
Bibliography .....	197
Figure 1 – Logical concept of home resource management architecture .....	11
Figure 2 – Overview of the home network resource management architecture .....	12
Figure 3 – Resource information provider collects data from one or more HES entities .....	13
Figure 4 – Resource management process model.....	14
Figure 5 – Management information .....	15
Figure 6 – Interfaces of resource management process .....	15
Figure 7 – Resource object hierarchy .....	18
Figure 8 – Resource object structure .....	19
Figure 9 – Home resource relation object .....	21
Table 1 – Notations in ISO/IEC and this standard .....	10
Table 2 – Definition of resource domain ID .....	19
Table 3 – Resource relation types .....	22
Table 4 – BNF notation of resource relation object.....	23
