

# DIN ISO 20785-2:2016-08 (E)

## Dosimetry for exposures to cosmic radiation in civilian aircraft - Part 2: Characterization of instrument response (ISO 20785-2:2011)

---

<b>Contents</b>	<b>Page</b>
National foreword .....	3
National Annex NA (informative) Relationship to European and international documents .....	4
National Annex NB (informative) Bibliography .....	5
Introduction.....	6
1 Scope .....	7
2 Normative references.....	7
3 Terms and definitions .....	8
3.1 General terms .....	8
3.2 Terms related to quantities and units .....	13
3.3 Terms related to the atmospheric radiation field .....	17
4 General considerations.....	18
4.1 The cosmic radiation field in the atmosphere.....	18
4.2 General considerations for the dosimetry of the cosmic radiation field in aircraft and requirements for the characterization of instrument response .....	20
4.3 General considerations for measurements at aviation altitudes .....	21
5 Calibration fields and procedures .....	22
5.1 General considerations.....	22
5.2 Characterization of an instrument .....	24
5.3 Instrument-related software .....	27
6 Uncertainties.....	28
7 Remarks on performance tests.....	28
Annex A (informative) Representative particle fluence energy distributions for the cosmic radiation field at flight altitudes for solar minimum and maximum conditions and for minimum and maximum vertical cut-off rigidity .....	29
Annex B (informative) Radiation fields recommended for use in calibrations.....	31
Annex C (informative) Comparison measurements .....	35
Annex D (informative) Charged-particle irradiation facilities .....	37
Bibliography.....	38
