

IEC/TR 62366-2:2016-04 (E)

Medical devices - Part 2: Guidance on the application of usability engineering to medical devices

Contents	Page
FOREWORD.....	6
INTRODUCTION.....	8
1 Scope and purpose.....	9
1.1 Scope.....	9
1.2 Purpose.....	9
2 Normative references.....	10
3 Terms and definitions.....	11
4 Mapping between the requirements of IEC 62366-1 and the guidance of IEC TR 62366-2.....	14
5 Background and justification of the USABILITY ENGINEERING program.....	14
5.1 How SAFETY relates to USABILITY.....	14
5.2 Reasons to invest in USABILITY ENGINEERING.....	15
6 How to implement a USABILITY ENGINEERING program.....	16
6.1 Effective USABILITY ENGINEERING programs.....	16
6.2 Effective USABILITY ENGINEERING projects and plans.....	16
6.3 Apply an appropriate level of USABILITY ENGINEERING expertise.....	17
6.4 Ensure the necessary resources are available and well timed.....	18
6.5 RISK MANAGEMENT as it relates to USABILITY ENGINEERING.....	18
6.5.1 RISK ANALYSIS.....	18
6.5.2 RISK CONTROL.....	19
6.5.3 Information for SAFETY.....	20
6.5.4 Overall evaluation of RESIDUAL RISK.....	22
6.6 USABILITY ENGINEERING FILE.....	22
6.7 Tailoring the USABILITY ENGINEERING effort.....	23
7 Overview of the USABILITY ENGINEERING PROCESS.....	24
8 Prepare the USE SPECIFICATION.....	27
8.1 Initiate USE SPECIFICATION.....	27
8.2 Analyse the intended USERS, anticipated USER TASKS and intended USE ENVIRONMENTS.....	28
8.2.1 Intended USERS.....	28
8.2.2 Anticipated USER TASKS.....	30
8.2.3 Intended USE ENVIRONMENT.....	30
8.3 Finalize the USE SPECIFICATION.....	30
8.4 Recommended methods for developing the USE SPECIFICATION.....	31
8.4.1 General.....	31
8.4.2 Contextual inquiry and observation.....	31
8.4.3 Interview and survey techniques.....	31
8.4.4 Expert reviews.....	32
8.4.5 Advisory panel reviews.....	32
8.4.6 USABILITY TESTS.....	32

9	Identify USER INTERFACE characteristics related to SAFETY and potential USE	32
	ERRORS.....	32
9.1	General.....	32
9.2	TASK ANALYSIS	33
9.3	FUNCTION ANALYSIS	33
9.4	Identify and analyse known problems	35
10	Identify known or foreseeable HAZARDS and HAZARDOUS SITUATIONS.....	35
11	Identify and describe HAZARD-RELATED USE SCENARIOS.....	36
11.1	Define USE SCENARIOS.....	36
11.2	USE SCENARIOS as they relate to RISK MANAGEMENT.....	36
11.3	Identify HAZARD-RELATED USE SCENARIOS.....	37
11.4	Methods to define and analyse HAZARD-RELATED USE SCENARIOS	37
12	Select the HAZARD-RELATED USE SCENARIOS for SUMMATIVE EVALUATION.....	38
12.1	General.....	38
12.2	Selection of the HAZARD-RELATED USE SCENARIOS based on SEVERITY.....	39
12.3	Selection of HAZARD-RELATED USE SCENARIOS based on other circumstances	39
13	Establish USER INTERFACE SPECIFICATION.....	40
13.1	Development of the USER INTERFACE SPECIFICATION.....	40
13.2	ACCOMPANYING DOCUMENTATION and training	40
14	Establish USER INTERFACE EVALUATION plan	41
14.1	Specify how the USER INTERFACE design will be explored and evaluated.....	41
14.2	FORMATIVE EVALUATION planning.....	42
14.3	SUMMATIVE EVALUATION planning	42
14.4	USABILITY TEST planning.....	43
14.5	Example USABILITY TEST protocol and report.....	43
15	Design and implement the USER INTERFACE and training.....	44
15.1	General.....	44
15.2	Develop conceptual model(s).....	46
15.3	Design software USER INTERFACES (if applicable)	47
15.3.1	General	47
15.3.2	Review USER INTERFACE REQUIREMENTS and constraints.....	47
15.3.3	Develop software USER INTERFACE structure(s)	47
15.3.4	Design wireframes	48
15.3.5	Design screen templates	48
15.4	Design hardware USER INTERFACES (if applicable).....	48
15.4.1	General	48
15.4.2	Review USER INTERFACE REQUIREMENTS and constraints.....	49
15.4.3	Develop concept sketches.....	49
15.5	Design materials necessary for training and training	49
15.5.1	General	49
15.5.2	Training materials	49
15.5.3	Training	51
15.6	Develop detailed designs.....	52
15.7	Verify the design of the USER INTERFACE.....	52

16	Perform FORMATIVE EVALUATIONS	52
16.1	Conduct multiple FORMATIVE EVALUATIONS.....	52
16.2	Recommended methods for FORMATIVE EVALUATION	53
16.2.1	General	53
16.2.2	Conduct heuristic analysis.....	54
16.2.3	Conduct cognitive walkthrough	54
16.2.4	Conduct USABILITY TESTS	54
16.3	Analysis of FORMATIVE EVALUATION results	55
17	Perform SUMMATIVE EVALUATION	55
17.1	General.....	55
17.2	Conduct a SUMMATIVE EVALUATION	56
17.3	Data collection	57
17.3.1	General	57
17.3.2	Observational data.....	57
17.3.3	Subjective data	58
17.4	Data analysis	59
18	Document the USABILITY ENGINEERING project.....	61
19	POST-PRODUCTION review and analysis	61
	Annex A (informative) Recommended reading list.....	64
	Annex B (informative) External resources to identify known problems	66
B.1	General.....	66
B.2	Austria	66
B.3	Germany	66
B.4	Sweden.....	67
B.5	Switzerland	67
B.6	United Kingdom	67
B.7	United States	67
	Annex C (informative) Developing USABILITY GOALS for commercial purposes	68
C.1	General.....	68
C.2	Objective goals	68
C.3	Subjective goals.....	69
	Annex D (informative) USABILITY ENGINEERING project end products.....	71
	Annex E (informative) USABILITY ENGINEERING methods	73
E.1	General.....	73
E.2	Advisory panel reviews.....	74
E.3	Brainstorm USE SCENARIOS.....	75
E.4	Cognitive walkthrough	75
E.5	Contextual inquiry	75
E.6	Day-in-the-life analysis.....	76
E.7	Expert reviews	77
E.8	FMEA and FTA	77
E.9	Focus groups	78
E.10	FUNCTION ANALYSIS	78
E.11	Heuristic analysis.....	79
E.12	Observation	79
E.13	One-on-one interviews	79
E.14	Participatory design	80
E.15	PCA analysis	80

E.16	SIMULATION.....	82
E.17	Standards reviews.....	82
E.18	Surveys	83
E.19	TASK ANALYSIS	83
E.20	Time-and-motion studies	84
E.21	Workload assessment	84
Annex F (informative)	USABILITY ENGINEERING studies in clinical settings	85
F.1	General.....	85
F.2	Sample study in the clinical environment	85
Annex G (informative)	USER PROFILE.....	87
Annex H (informative)	USE ENVIRONMENT descriptions	89
Annex I (informative)	USER INTERFACE REQUIREMENTS	91
Annex J (informative)	Model the USER INTERFACE	92
J.1	General.....	92
J.2	Develop preliminary prototype(s)	92
J.3	Develop a refined prototype.....	92
J.4	Develop a specification prototype	93
J.5	Prepare a style guide	93
Annex K (informative)	USABILITY TEST sample size	94
Annex L (informative)	Identifying distinct USER groups	97
	Bibliography	98
	Index of defined terms	101
Figure 1	– Example of a USABILITY ENGINEERING project for a graphical USER INTERFACE	26
Figure 2	– Progression of a USER INTERFACE design from multiple concepts to a few concepts to a preferred concept	46
Figure 3	– Progression of concepts from multiple concepts to a few concepts to a preferred concept	50
Figure E.1	– Sample of a USE ENVIRONMENT within a hospital.....	76
Figure E.2	– Model of USER-MEDICAL DEVICE interaction	81
Figure E.3	– Infant manikin used in a neonatal care unit simulator (left), test participant simulating an auto-injector (centre) and an adult manikin used in a surgery SIMULATION (right)	82
Figure E.4	– Example hierarchical TASK ANALYSIS.....	84
Figure J.1	– USER INTERFACE designers using prototyping software to build and test a USER INTERFACE.....	93
Figure K.1	– Number of test participants needed in a USABILITY TEST for FORMATIVE EVALUATION	95
Table 1	– Mapping between the requirements of IEC 62366-1 and the guidance of IEC TR 62366-2.....	14
Table 2	– Human versus machine capabilities	34
Table 3	– Example of five qualitative SEVERITY levels (adapted from Table D.3 of ISO 14971:2007)	39

Table 4 – Example outline of a USABILITY TEST protocol	44
Table 5 – Example outline of a USABILITY TEST report	44
Table 6 – USE ERRORS caused by sample USER INTERFACE design shortcomings.....	55
Table 7 – Sample USE ERRORS and their root causes.....	60
Table D.1 – USABILITY ENGINEERING project end products.....	71
Table E.1 – Recommended application of USABILITY methods.....	74
Table G.1 – Sample USER PROFILE	87
Table H.1 – Sample USE ENVIRONMENT	89
Table I.1 – Sample USER INTERFACE REQUIREMENTS	91
Table K.1 – Cumulative probability of detecting a USABILITY problem	96
