

IEC/TR 62366-2:2016-04 (E)

Medical devices - Part 2: Guidance on the application of usability engineering to medical devices

| Contents | Page |
|---|------|
| FOREWORD..... | 6 |
| INTRODUCTION..... | 8 |
| 1 Scope and purpose..... | 9 |
| 1.1 Scope..... | 9 |
| 1.2 Purpose..... | 9 |
| 2 Normative references..... | 10 |
| 3 Terms and definitions..... | 11 |
| 4 Mapping between the requirements of IEC 62366-1 and the guidance of IEC TR 62366-2..... | 14 |
| 5 Background and justification of the USABILITY ENGINEERING program..... | 14 |
| 5.1 How SAFETY relates to USABILITY..... | 14 |
| 5.2 Reasons to invest in USABILITY ENGINEERING..... | 15 |
| 6 How to implement a USABILITY ENGINEERING program..... | 16 |
| 6.1 Effective USABILITY ENGINEERING programs..... | 16 |
| 6.2 Effective USABILITY ENGINEERING projects and plans..... | 16 |
| 6.3 Apply an appropriate level of USABILITY ENGINEERING expertise..... | 17 |
| 6.4 Ensure the necessary resources are available and well timed..... | 18 |
| 6.5 RISK MANAGEMENT as it relates to USABILITY ENGINEERING..... | 18 |
| 6.5.1 RISK ANALYSIS..... | 18 |
| 6.5.2 RISK CONTROL..... | 19 |
| 6.5.3 Information for SAFETY..... | 20 |
| 6.5.4 Overall evaluation of RESIDUAL RISK..... | 22 |
| 6.6 USABILITY ENGINEERING FILE..... | 22 |
| 6.7 Tailoring the USABILITY ENGINEERING effort..... | 23 |
| 7 Overview of the USABILITY ENGINEERING PROCESS..... | 24 |
| 8 Prepare the USE SPECIFICATION..... | 27 |
| 8.1 Initiate USE SPECIFICATION..... | 27 |
| 8.2 Analyse the intended USERS, anticipated USER TASKS and intended USE ENVIRONMENTS..... | 28 |
| 8.2.1 Intended USERS..... | 28 |
| 8.2.2 Anticipated USER TASKS..... | 30 |
| 8.2.3 Intended USE ENVIRONMENT..... | 30 |
| 8.3 Finalize the USE SPECIFICATION..... | 30 |
| 8.4 Recommended methods for developing the USE SPECIFICATION..... | 31 |
| 8.4.1 General..... | 31 |
| 8.4.2 Contextual inquiry and observation..... | 31 |
| 8.4.3 Interview and survey techniques..... | 31 |
| 8.4.4 Expert reviews..... | 32 |
| 8.4.5 Advisory panel reviews..... | 32 |
| 8.4.6 USABILITY TESTS..... | 32 |

| | | |
|--------|--|----|
| 9 | Identify USER INTERFACE characteristics related to SAFETY and potential USE | 32 |
| | ERRORS..... | 32 |
| 9.1 | General..... | 32 |
| 9.2 | TASK ANALYSIS | 33 |
| 9.3 | FUNCTION ANALYSIS | 33 |
| 9.4 | Identify and analyse known problems | 35 |
| 10 | Identify known or foreseeable HAZARDS and HAZARDOUS SITUATIONS..... | 35 |
| 11 | Identify and describe HAZARD-RELATED USE SCENARIOS..... | 36 |
| 11.1 | Define USE SCENARIOS..... | 36 |
| 11.2 | USE SCENARIOS as they relate to RISK MANAGEMENT..... | 36 |
| 11.3 | Identify HAZARD-RELATED USE SCENARIOS..... | 37 |
| 11.4 | Methods to define and analyse HAZARD-RELATED USE SCENARIOS | 37 |
| 12 | Select the HAZARD-RELATED USE SCENARIOS for SUMMATIVE EVALUATION..... | 38 |
| 12.1 | General..... | 38 |
| 12.2 | Selection of the HAZARD-RELATED USE SCENARIOS based on SEVERITY..... | 39 |
| 12.3 | Selection of HAZARD-RELATED USE SCENARIOS based on other circumstances | 39 |
| 13 | Establish USER INTERFACE SPECIFICATION..... | 40 |
| 13.1 | Development of the USER INTERFACE SPECIFICATION..... | 40 |
| 13.2 | ACCOMPANYING DOCUMENTATION and training | 40 |
| 14 | Establish USER INTERFACE EVALUATION plan | 41 |
| 14.1 | Specify how the USER INTERFACE design will be explored and evaluated..... | 41 |
| 14.2 | FORMATIVE EVALUATION planning..... | 42 |
| 14.3 | SUMMATIVE EVALUATION planning | 42 |
| 14.4 | USABILITY TEST planning..... | 43 |
| 14.5 | Example USABILITY TEST protocol and report..... | 43 |
| 15 | Design and implement the USER INTERFACE and training..... | 44 |
| 15.1 | General..... | 44 |
| 15.2 | Develop conceptual model(s)..... | 46 |
| 15.3 | Design software USER INTERFACES (if applicable) | 47 |
| 15.3.1 | General | 47 |
| 15.3.2 | Review USER INTERFACE REQUIREMENTS and constraints..... | 47 |
| 15.3.3 | Develop software USER INTERFACE structure(s) | 47 |
| 15.3.4 | Design wireframes | 48 |
| 15.3.5 | Design screen templates | 48 |
| 15.4 | Design hardware USER INTERFACES (if applicable)..... | 48 |
| 15.4.1 | General | 48 |
| 15.4.2 | Review USER INTERFACE REQUIREMENTS and constraints..... | 49 |
| 15.4.3 | Develop concept sketches..... | 49 |
| 15.5 | Design materials necessary for training and training | 49 |
| 15.5.1 | General | 49 |
| 15.5.2 | Training materials | 49 |
| 15.5.3 | Training | 51 |
| 15.6 | Develop detailed designs..... | 52 |
| 15.7 | Verify the design of the USER INTERFACE..... | 52 |

| | | |
|--------|--|----|
| 16 | Perform FORMATIVE EVALUATIONS | 52 |
| 16.1 | Conduct multiple FORMATIVE EVALUATIONS..... | 52 |
| 16.2 | Recommended methods for FORMATIVE EVALUATION | 53 |
| 16.2.1 | General | 53 |
| 16.2.2 | Conduct heuristic analysis..... | 54 |
| 16.2.3 | Conduct cognitive walkthrough | 54 |
| 16.2.4 | Conduct USABILITY TESTS | 54 |
| 16.3 | Analysis of FORMATIVE EVALUATION results | 55 |
| 17 | Perform SUMMATIVE EVALUATION | 55 |
| 17.1 | General..... | 55 |
| 17.2 | Conduct a SUMMATIVE EVALUATION | 56 |
| 17.3 | Data collection | 57 |
| 17.3.1 | General | 57 |
| 17.3.2 | Observational data..... | 57 |
| 17.3.3 | Subjective data | 58 |
| 17.4 | Data analysis | 59 |
| 18 | Document the USABILITY ENGINEERING project..... | 61 |
| 19 | POST-PRODUCTION review and analysis | 61 |
| | Annex A (informative) Recommended reading list..... | 64 |
| | Annex B (informative) External resources to identify known problems | 66 |
| B.1 | General..... | 66 |
| B.2 | Austria | 66 |
| B.3 | Germany | 66 |
| B.4 | Sweden..... | 67 |
| B.5 | Switzerland | 67 |
| B.6 | United Kingdom | 67 |
| B.7 | United States | 67 |
| | Annex C (informative) Developing USABILITY GOALS for commercial purposes | 68 |
| C.1 | General..... | 68 |
| C.2 | Objective goals | 68 |
| C.3 | Subjective goals..... | 69 |
| | Annex D (informative) USABILITY ENGINEERING project end products..... | 71 |
| | Annex E (informative) USABILITY ENGINEERING methods | 73 |
| E.1 | General..... | 73 |
| E.2 | Advisory panel reviews..... | 74 |
| E.3 | Brainstorm USE SCENARIOS..... | 75 |
| E.4 | Cognitive walkthrough | 75 |
| E.5 | Contextual inquiry | 75 |
| E.6 | Day-in-the-life analysis..... | 76 |
| E.7 | Expert reviews | 77 |
| E.8 | FMEA and FTA | 77 |
| E.9 | Focus groups | 78 |
| E.10 | FUNCTION ANALYSIS | 78 |
| E.11 | Heuristic analysis..... | 79 |
| E.12 | Observation | 79 |
| E.13 | One-on-one interviews | 79 |
| E.14 | Participatory design | 80 |
| E.15 | PCA analysis | 80 |

| | | |
|-----------------------|---|-----|
| E.16 | SIMULATION..... | 82 |
| E.17 | Standards reviews..... | 82 |
| E.18 | Surveys | 83 |
| E.19 | TASK ANALYSIS | 83 |
| E.20 | Time-and-motion studies | 84 |
| E.21 | Workload assessment | 84 |
| Annex F (informative) | USABILITY ENGINEERING studies in clinical settings | 85 |
| F.1 | General..... | 85 |
| F.2 | Sample study in the clinical environment | 85 |
| Annex G (informative) | USER PROFILE..... | 87 |
| Annex H (informative) | USE ENVIRONMENT descriptions | 89 |
| Annex I (informative) | USER INTERFACE REQUIREMENTS | 91 |
| Annex J (informative) | Model the USER INTERFACE | 92 |
| J.1 | General..... | 92 |
| J.2 | Develop preliminary prototype(s) | 92 |
| J.3 | Develop a refined prototype..... | 92 |
| J.4 | Develop a specification prototype | 93 |
| J.5 | Prepare a style guide | 93 |
| Annex K (informative) | USABILITY TEST sample size | 94 |
| Annex L (informative) | Identifying distinct USER groups | 97 |
| | Bibliography | 98 |
| | Index of defined terms | 101 |
| Figure 1 – | Example of a USABILITY ENGINEERING project for a graphical USER INTERFACE | 26 |
| Figure 2 – | Progression of a USER INTERFACE design from multiple concepts to a few concepts to a preferred concept | 46 |
| Figure 3 – | Progression of concepts from multiple concepts to a few concepts to a preferred concept | 50 |
| Figure E.1 – | Sample of a USE ENVIRONMENT within a hospital..... | 76 |
| Figure E.2 – | Model of USER-MEDICAL DEVICE interaction | 81 |
| Figure E.3 – | Infant manikin used in a neonatal care unit simulator (left), test participant simulating an auto-injector (centre) and an adult manikin used in a surgery SIMULATION (right) | 82 |
| Figure E.4 – | Example hierarchical TASK ANALYSIS..... | 84 |
| Figure J.1 – | USER INTERFACE designers using prototyping software to build and test a USER INTERFACE..... | 93 |
| Figure K.1 – | Number of test participants needed in a USABILITY TEST for FORMATIVE EVALUATION | 95 |
| Table 1 – | Mapping between the requirements of IEC 62366-1 and the guidance of IEC TR 62366-2..... | 14 |
| Table 2 – | Human versus machine capabilities | 34 |
| Table 3 – | Example of five qualitative SEVERITY levels (adapted from Table D.3 of ISO 14971:2007) | 39 |

| | |
|---|----|
| Table 4 – Example outline of a USABILITY TEST protocol | 44 |
| Table 5 – Example outline of a USABILITY TEST report | 44 |
| Table 6 – USE ERRORS caused by sample USER INTERFACE design shortcomings..... | 55 |
| Table 7 – Sample USE ERRORS and their root causes..... | 60 |
| Table D.1 – USABILITY ENGINEERING project end products..... | 71 |
| Table E.1 – Recommended application of USABILITY methods..... | 74 |
| Table G.1 – Sample USER PROFILE | 87 |
| Table H.1 – Sample USE ENVIRONMENT | 89 |
| Table I.1 – Sample USER INTERFACE REQUIREMENTS | 91 |
| Table K.1 – Cumulative probability of detecting a USABILITY problem | 96 |
