

ISO/IEC 11801-6:2017-11 (E)

Information technology - Generic cabling for customer premises - Part 6: Distributed building services

CONTENTS

- FOREWORD.....5
- INTRODUCTION.....6
- 1 Scope.....9
- 2 Normative references9
- 3 Terms, definitions and abbreviated terms10
 - 3.1 Terms and definitions.....10
 - 3.2 Abbreviated terms.....11
- 4 Conformance.....11
- 5 Structure of the generic cabling system12
 - 5.1 General.....12
 - 5.2 Functional elements.....12
 - 5.2.1 Stand-alone structure12
 - 5.2.2 Overlay structure13
 - 5.3 General structure and hierarchy13
 - 5.3.1 Type A generic cabling13
 - 5.3.2 Type B generic cabling14
 - 5.4 Cabling subsystems15
 - 5.4.1 Campus and building backbone cabling subsystem.....15
 - 5.4.2 Service distribution cabling subsystem (Type A generic cabling).....15
 - 5.4.3 Service distribution cabling subsystem (Type B generic cabling).....15
 - 5.4.4 Design objectives16
 - 5.5 Accommodation of functional elements16
 - 5.5.1 General16
 - 5.5.2 Accommodation of service outlets.....16
 - 5.5.3 Accommodation of service concentration points.....17
 - 5.6 Interfaces.....17
 - 5.6.1 Equipment interfaces and test interfaces17
 - 5.6.2 Channels and links18
 - 5.7 Dimensioning and configuring19
 - 5.7.1 General19
 - 5.7.2 Type A generic cabling21
 - 5.7.3 Type B generic cabling22
 - 5.7.4 Service concentration point.....23
 - 5.7.5 Connecting hardware.....23
 - 5.7.6 Telecommunications rooms and equipment rooms23
 - 5.8 Relevant building services23

6	Channel performance requirements	23
6.1	General.....	23
6.2	Environmental performance	25
6.3	Transmission performance	25
6.3.1	General	25
6.3.2	Balanced cabling	25
6.3.3	Optical fibre cabling.....	26
7	Link performance requirements	26
7.1	General.....	26
7.2	Balanced cabling	27
7.3	Optical fibre cabling	27
8	Reference implementations	27
8.1	General.....	27
8.2	Balanced cabling	27
8.2.1	General	27
8.2.2	Service distribution cabling (Type A generic cabling)	28
8.2.3	Service distribution cabling (Type B generic cabling).....	31
8.2.4	Campus and building backbone cabling	31
8.3	Optical fibre cabling	31
8.3.1	Service distribution cabling (Type A generic cabling)	31
8.3.2	Service distribution cabling (Type B generic cabling)	32
8.3.3	Campus and building backbone cabling	32
9	Cable requirements	32
9.1	General.....	32
9.2	Balanced cables	32
9.3	Optical fibre cables	32
10	Connecting hardware requirements	32
10.1	General requirements	32
10.2	Connecting hardware for balanced cabling.....	32
10.2.1	General requirements	32
10.2.2	Electrical, mechanical and environmental performance.....	32
10.3	Connecting hardware for optical fibre cabling.....	33
11	Cords	33
11.1	Jumpers.....	33
11.2	Balanced cords	33
11.3	Optical fibre cords.....	33
Annex A	(informative) Services and applications.....	34
A.1	Overview.....	34
A.2	Service sectors and services.....	34
A.2.1	Access control	34
A.2.2	Burglar alarms	35
A.2.3	Asset management	35
A.2.4	Audio-visual.....	35
A.2.5	Building information systems	35
A.2.6	Building well-being and structural sensor systems	35
A.2.7	Energy management.....	35
A.2.8	Environmental control.....	36
A.2.9	Fixed information technology services	36
A.2.10	Personal well-being	36
A.2.11	Shared information technology services.....	36
A.3	Service concentration point grid density.....	38
A.4	Cabling provision to service concentration points	39

Annex B (informative) Overlay	40
B.1 General.....	40
B.2 Functional elements.....	40
B.2.1 Type A generic cabling	40
B.2.2 Type B generic cabling	40
B.3 General structure and hierarchy.....	40
B.3.1 Type A generic cabling	40
B.3.2 Type B generic cabling	40
Annex C (informative) Optical fibre within the Type B service distribution cabling subsystem	41
C.1 Overview.....	41
C.2 Implementation recommendations.....	41
C.2.1 Channel performance	41
C.2.2 Reference implementation	41
C.2.3 Cables.....	42
C.2.4 Connecting hardware.....	42
C.2.5 Cords	42
Bibliography.....	43
