ISO 14708-2:2019 (E)

Implants for surgery — Active implantable medical devices — Part 2: Cardiac pacemakers

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols and abbreviated terms

5 General requirements for non-implantable parts

- 5.1 General requirements for non-implantable parts
- 5.2 General requirements for software
- 5.3 Usability of non-implantable parts
- 5.4 Data security and protection from harm caused by unauthorized information tampering
- 5.5 General requirements for risk management
- 5.6 Misconnection of parts of the active implantable medical device

6 Measurements of implantable pulse generator and lead characteristics

- 6.1 Measurement of implantable pulse generator characteristics
- 6.1.1 General considerations
- 6.1.2 Measurement of pulse amplitude, pulse duration, pulse interval, and pulse rate
- 6.1.3 Measurement of sensitivity (epos and eneg)
- 6.1.4 Measurement of input impedance (Zin)
- 6.1.5 Measurement of escape interval (te)
- 6.1.6 Measurement of sensing refractory period (tsr)
- 6.1.7 Measurement of pacing refractory period (tpr) (applicable only to inhibited implantable pulse generators)
- 6.1.8 Measurement of AV interval (applicable only to dual-chamber implantable pulse generators)
- 6.1.9 Measurement of the post-ventricular atrial refractory period (PVARP) (applicable only to implantable pulse generators with atrial sensing and ventricular pacing)
- 6.1.10 Measurement of the atrial-ventricular (AV) interval after sensing (applicable only to implantable pulse generators with atrial sensing and ventricular pacing)
- 6.2 Measurement of the lead pacing impedance (Zp)
- 6.2.1 Measurement equipment accuracy
- 6.2.2 Methods of measuring lead pacing impedance
- 6.2.3 In vitro method for measurement of lead pacing impedance

7 General arrangement of the packaging

8 General markings for active implantable medical devices

9 Markings on the sales packaging

10 Construction of the sales packaging

11 Markings on the sterile pack

12 Construction of the non-reusable pack

13 Markings on the active implantable medical device

14 Protection from unintentional biological effects being caused by the active implantable medical device

15 Protection from harm to the patient or user caused by external physical features of the active implantable medical device

16 Protection from harm to the patient caused by electricity

17 Protection from harm to the patient caused by heat

18 Protection from ionizing radiation released or emitted from the active implantable medical device

19 Protection from unintended effects caused by the device

20 Protection of the device from damage caused by external defibrillators

21 Protection of the device from changes caused by high power electrical fields applied directly to the patient

22 Protection of the active implantable medical device from changes caused by miscellaneous medical treatments

23 Protection of the active implantable medical device from mechanical forces

24 Protection of the active implantable medical device from damage caused by electrostatic discharge

25 Protection of the active implantable medical device from damage caused by atmospheric pressure changes

26 Protection of the active implantable medical device from damage caused by temperature changes

27 Protection of the active implantable medical device from electromagnetic non-ionizing radiation

28 Accompanying documentation

Annex A (informative) Relationship between the fundamental principles in ISO/TR 14283 and the clauses of this document

Annex B (informative) Rationale

B.1 General
B.2 Notes on specific subclauses

Annex C (informative) Code for describing modes of implantable pulse generators

C.1 General
C.2 The code
C.3 Modes of implantable pulse generators

Annex D (normative) Pulse forms

Page count: 71
