

# ISO 14708-6:2019 (E)

## Implants for surgery — Active implantable medical devices — Part 6: Particular requirements for active implantable medical devices intended to treat tachyarrhythmia (including implantable defibrillators)

---

### Contents

|       |   |
|-------|---|
|       | Foreword  |
|       | Introduction  |
| 1     | Scope   |
| 2     | Normative references  |
| 3     | Terms and definitions   |
| 4     | Symbols and abbreviated terms   |
| 5     | General requirements for non-implantable parts  |
| 5.1   | General requirements for non-implantable parts  |
| 5.2   | General requirements for software   |
| 5.3   | Usability of non-implantable parts  |
| 5.4   | Data security and protection from harm caused by unauthorized information tampering                 |
| 5.5   | General requirements for risk management  |
| 5.6   | Misconnection of parts of the active implantable medical device                                     |
| 6     | Measurement of implantable pulse generator and lead characteristics                                 |
| 6.1   | Measurement of implantable pulse generator characteristics  |
| 6.1.1 | General considerations  |
| 6.1.2 | Measurement of the bradyarrhythmia characteristics  |
| 6.1.3 | Measurement of ICD output voltage   |
| 6.1.4 | Measurement of delivered CD pulse energy  |
| 6.1.5 | Measurement of the antitachyarrhythmia pacing pulse amplitude                                       |
| 6.1.6 | Measurement of the sensitivity of an implantable pulse generator with automatic sensitivity control |
| 6.1.7 | Charge time   |
| 6.1.8 | Capacitor formation (capacitor maintenance)   |
| 6.2   | Measurement of the electrical characteristic of a sensing/pacing lead                               |
| 7     | General arrangement of the packaging  |
| 8     | General markings for active implantable medical devices   |
| 9     | Markings on the sales packaging   |
| 10    | Construction of the sales packaging   |
| 11    | Markings on the sterile pack  |
| 12    | Construction of the non-reusable pack   |
| 13    | Markings on the active implantable medical device   |
| 14    | Protection from unintended biological effects being caused by the active implantable medical device |

- 15 Protection from harm to the patient or user caused by external physical features of the active implantable medical device
- 16 Protection from harm to the patient caused by electricity
- 17 Protection from harm to the patient caused by heat
  - 17.1 Protection from harm to the patient caused by heat
  - 17.2 Active implantable medical device intended to supply heat
- 18 Protection from ionizing radiation released or emitted from the active implantable medical device
- 19 Protection from unintended effects caused by the device
- 20 Protection of the device from damage caused by external defibrillators
- 21 Protection of the device from changes caused by high-power electrical fields applied directly to the patient
- 22 Protection of the active implantable medical device from changes caused by miscellaneous medical treatments
- 23 Protection of the active implantable medical device from mechanical forces
- 24 Protection of the active implantable medical device from damage caused by electrostatic discharge
- 25 Protection of the active implantable medical device from damage caused by atmospheric pressure changes
- 26 Protection of the active implantable medical device from damage caused by temperature changes
- 27 Protection of the active implantable medical device from electromagnetic non-ionizing radiation
- 28 Accompanying documentation
- Annex A (informative) Relationship between the fundamental principles in ISO/TR 14283 and the clauses of this document
- Annex B (informative) Notes on ISO 14708-6
  - B.1 General
  - B.2 Notes on specific clauses and subclauses
- Annex C (informative) Code for describing modes of implantable pulse generators
  - C.1 General
  - C.2 The code
  - C.3 Usage
