## Determination of the characteristic limits (decision threshold, detection limit and limits of the coverage interval) for measurements of ionizing radiation - Fundamentals and application - Part 1: Elementary applications

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Normative references .....</b>	<b>2</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>2</b>
<b>4</b>	<b>Quantities and symbols .....</b>	<b>6</b>
<b>5</b>	<b>Summary of procedures for evaluating a measurement and calculating the characteristic limits .....</b>	<b>8</b>
<b>5.1</b>	<b>General aspects .....</b>	<b>8</b>
<b>5.2</b>	<b>Modelling the measurement .....</b>	<b>9</b>
<b>5.3</b>	<b>General considerations about the applicability of the ISO/IEC Guide 98-3 .....</b>	<b>9</b>
<b>5.4</b>	<b>Evaluating the input quantities, standard uncertainties and covariances, and the primary result and its associated standard uncertainty .....</b>	<b>10</b>
<b>5.5</b>	<b>Evaluating the standard uncertainty as a function of an assumed true value of the measurand .....</b>	<b>10</b>
<b>5.6</b>	<b>Calculating the decision threshold and decisions to be made .....</b>	<b>11</b>
<b>5.7</b>	<b>Calculating the detection limit and assessment of the measurement procedure .....</b>	<b>12</b>
<b>5.8</b>	<b>Calculating a coverage interval for the measurand .....</b>	<b>12</b>
<b>5.9</b>	<b>Calculating the best estimate of the measurand and its associated standard uncertainty ..</b>	<b>13</b>
<b>5.10</b>	<b>Reporting the results .....</b>	<b>14</b>
<b>6</b>	<b>Fundamentals and evaluation of the measurement .....</b>	<b>16</b>
<b>6.1</b>	<b>General aspects concerning the measurand .....</b>	<b>16</b>
<b>6.2</b>	<b>Model of evaluation .....</b>	<b>16</b>
<b>6.2.1</b>	<b>General model .....</b>	<b>16</b>
<b>6.2.2</b>	<b>Model in ionizing radiation counting measurements .....</b>	<b>17</b>
<b>6.3</b>	<b>Evaluation of the primary measurement result .....</b>	<b>18</b>
<b>6.4</b>	<b>Standard uncertainty associated with the primary measurement result .....</b>	<b>18</b>
<b>7</b>	<b>Standard uncertainty as a function of an assumed value of the measurand .....</b>	<b>19</b>
<b>8</b>	<b>Decision threshold, detection limit and assessments .....</b>	<b>21</b>
<b>8.1</b>	<b>Specifications .....</b>	<b>21</b>
<b>8.2</b>	<b>Decision threshold .....</b>	<b>21</b>
<b>8.3</b>	<b>Detection limit .....</b>	<b>21</b>
<b>8.4</b>	<b>Assessments .....</b>	<b>22</b>
<b>9</b>	<b>Limits of the coverage interval .....</b>	<b>23</b>
<b>9.1</b>	<b>General aspects .....</b>	<b>23</b>
<b>9.2</b>	<b>The probabilistically symmetric coverage interval .....</b>	<b>23</b>
<b>9.3</b>	<b>The shortest coverage interval .....</b>	<b>24</b>
<b>10</b>	<b>The best estimate and its associated standard uncertainty .....</b>	<b>24</b>

11	Documentation .....	25
	Annex A (normative) Repeated counting measurements with random influences .....	27
	Annex B (normative) Measurements with ratemeters .....	32
	Annex C (informative) Calculation of the detection limit by iteration .....	34
	Annex D (informative) Calculations with a generalized net count rate .....	36
	Annex E (informative) Distribution function of the standardized normal distribution .....	39
	Bibliography .....	44
