

ISO/IEC TS 20125-1:2026-02 (E)

Information technology - Digital services ecodesign - Part 1: Ecopractices for life cycle stages

Contents

Page

- Foreword..... v
- Introduction..... vi
- 1 Scope..... 1
- 2 Normative references..... 1
- 3 Terms, definitions and abbreviations..... 1
 - 3.1 Terms..... 1
 - 3.2 Abbreviated terms..... 5
- 4 Principles, usage guidelines and clarifications for digital services ecodesign..... 5
 - 4.1 Underlying principles..... 5
 - 4.2 Intended audience..... 5
 - 4.3 How to read and use the document and implementation matters..... 6
 - 4.3.1 How to read and use the document..... 6
 - 4.3.2 Implementation matters..... 6
 - 4.3.3 Trade-offs..... 7
 - 4.4 Environmental impacts..... 7
 - 4.5 Selection process..... 8
 - 4.6 Development environment..... 9
 - 4.7 Indicators..... 9
- 5 Life cycle stages..... 9
 - 5.1 General..... 9
 - 5.2 Stage 1: Requirements gathering, prioritization and contextualization..... 10
 - 5.3 Stage 2: Design phase..... 10
 - 5.4 Stage 3: Implementation..... 11
 - 5.5 Stage 4: Use and run or operations..... 11
 - 5.6 Stage 5: Maintenance..... 11
 - 5.7 Stage 6: End of life..... 12
- 6 Requirements and recommendations per stage..... 12
 - 6.1 Stage 1: Requirements gathering, prioritization and contextualization..... 12
 - 6.1.1 Collect and challenge functional requirements and usages ecopractice..... 12
 - 6.1.2 Analyse and size requirements and usages to the minimum ecopractice..... 13
 - 6.1.3 Challenge the added value of the service for all or part of service ecopractice..... 14
 - 6.1.4 Assess the impact of digital service ecopractice..... 14
 - 6.1.5 Set an environmental budget ecopractice..... 16
 - 6.1.6 Take a systemic view on service ecopractice..... 16
 - 6.2 Stage 2: Design phase..... 17
 - 6.2.1 Document the ecodesign methodology ecopractice..... 17
 - 6.2.2 Design user path using a frugal approach ecopractice..... 18
 - 6.2.3 Identify minimal technical solutions to meet the requirements ecopractice..... 19
 - 6.2.4 Setup a data retention and purge policy ecopractice..... 21
 - 6.2.5 Assess design consistency with regards to initial requirements and environmental challenges ecopractice..... 22
 - 6.2.6 Prepare and plan total or partial service end of life ecopractice..... 23
 - 6.3 Stage 3: Implementation..... 24
 - 6.3.1 Collect strictly needed items ecopractice..... 24
 - 6.3.2 Limit and optimise processing ecopractice..... 25
 - 6.3.3 Select scalable and appropriate technologies and infrastructures ecopractice..... 27
 - 6.3.4 Integrate a service usage and efficiency monitoring ecopractice..... 28
 - 6.3.5 Favour consolidation, sharing and capitalisation of service elements ecopractice..... 29

| | | |
|----------|---|-----------|
| 6.4 | Stage 4: Use and run or operations | 30 |
| 6.4.1 | Manage service frontend to maintain its efficiency ecopractice | 30 |
| 6.4.2 | Manage service backend to maintain its efficiency ecopractice | 31 |
| 6.4.3 | Monitor service ecosystem to maintain its efficiency ecopractice | 32 |
| 6.4.4 | Raise users' awareness of service usage environmental impacts ecopractice | 33 |
| 6.4.5 | Ensure usefulness of each service function ecopractice | 34 |
| 6.4.6 | Check usability of each service function ecopractice | 35 |
| 6.4.7 | Check usage of every function of the service ecopractice | 36 |
| 6.5 | Stage 5: Maintenance | 37 |
| 6.5.1 | Ensure continuous training of teams and monitor ecodesign practices ecopractice | 37 |
| 6.5.2 | Fix service frontend to maintain and enhance its efficiency ecopractice | 38 |
| 6.5.3 | Fix service backend to maintain and enhance its efficiency ecopractice | 38 |
| 6.5.4 | Assess emerging technology opportunities to enhance service efficiency and fight its obsolescence ecopractice | 39 |
| 6.6 | Stage 6: End of life | 40 |
| 6.6.1 | Question appropriateness of stopping the service totally or partially ecopractice | 40 |
| 6.6.2 | Decide on future of specific data of service ecopractice | 40 |
| 6.6.3 | Decide on future of specific software of service ecopractice | 41 |
| 6.6.4 | Decide on future of freed up hardware and resources ecopractice | 42 |
| 7 | Conformance and communication | 42 |
| 7.1 | Conformance | 42 |
| 7.1.1 | General | 42 |
| 7.1.2 | Partial conformance | 42 |
| 7.1.3 | Full conformance | 43 |
| 7.2 | Communication | 43 |
| 7.2.1 | General | 43 |
| 7.2.2 | Partial conformance | 43 |
| 7.2.3 | Full conformance | 44 |
| | Annex A (informative) Cross reference table of ecopractices and service types | 45 |
| | Annex B (normative) Architecture of digital services | 47 |
| | Annex C (informative) Environmental impacts table | 50 |
| | Annex D (informative) Impacts assessment methodologies | 52 |
| | Annex E (informative) Ecodesign and "SQuaRE" mapping | 56 |
| | Bibliography | 61 |
