

# ISO 14708-2:2005-10 (E)

## Implants for surgery - Active implantable medical devices - Part 2: Cardiac pacemakers

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Definitions .....	2
4	Symbols and abbreviations (optional) .....	5
5	General requirements for non-implantable parts .....	5
6	Measurement of IMPLANTABLE PULSE GENERATOR and LEAD characteristics .....	5
7	General arrangement of the packaging .....	19
8	General markings for active implantable medical devices .....	19
9	Markings on the sales packaging .....	19
10	Construction of the sales packaging .....	20
11	Markings on the sterile pack .....	21
12	Construction of the non-reusable pack .....	22
13	Markings on the active implantable medical device .....	22
14	Protection from unintentional biological effects being caused by the active implantable medical device .....	23
15	Protection from harm to the patient or user caused by external physical features of the active implantable medical device .....	23
16	Protection from harm to the patient caused by electricity .....	23
17	Protection from harm to the patient caused by heat .....	24
18	Protection from ionizing radiation released or emitted from the active implantable medical device .....	24
19	Protection from unintended effects caused by the device .....	24
20	Protection of the device from damage caused by external defibrillators .....	25
21	Protection of the device from changes caused by high power electrical fields applied directly to the patient .....	26

22	Protection of the active implantable medical device from changes caused by miscellaneous medical treatments .....	26
23	Protection of the active implantable medical device from mechanical forces .....	26
24	Protection of the active implantable medical device from damage caused by electrostatic discharge .....	31
25	Protection of the active implantable medical device from damage caused by atmospheric pressure changes .....	31
26	Protection of the active implantable medical device from damage caused by temperature changes .....	31
27	Protection of the active implantable medical device from electromagnetic non-ionizing radiation .....	31
28	Accompanying documentation .....	45
Annexes	<b>Annex A (informative) Relationship between the fundamental principles in ISO/TR 14283 and the clauses of this standard .....</b>	<b>50</b>
	<b>Annex B (informative) Relationship between the clauses of this standard and the fundamental principles listed in Annex A .....</b>	<b>72</b>
	<b>Annex D (informative) Code for describing modes of IMPLANTABLE PULSE GENERATORS .....</b>	<b>85</b>
	<b>Annex E (informative) .....</b>	<b>89</b>
	<b>Annex F (normative) Pulse Forms .....</b>	<b>90</b>
	<b>Annex G (normative) Interface circuits .....</b>	<b>91</b>
	<b>Annex H (informative) Selection of capacitor CX .....</b>	<b>94</b>
	<b>Annex I (normative) Calibration of the injection network, Figure G.104 .....</b>	<b>95</b>
