ISO 4701:2008-10 (E)

Iron ores and direct reduced iron - Determination of size distribution by sieving

Contents

Page

Foreword v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Principles and planning 2
4.1 General 2
4.2 Purpose of the analysis 2
4.3 Impact of ore and DRI properties 2
4.4 Nature of sample 4
4.5 Choice of sieving method 4
4.6 Maximum particle size permitted on a sieve 5
4.7 Specified loading of sieves 5
4.8 Sieving time 6

5 Apparatus 7
5.1 Sieve media 7
5.2 Sieving machines 8
5.3 Accessories for wet sieving 8
5.4 Drying equipment 8
5.5 Equipment for the determination of mass 8

6 Samples 10
6.1 Derivation of size sample 10
6.2 Mass of test sample(s) for sieving 10

7 Procedures 11
7.1 Drying 11
7.2 Division 12
7.3 Preparation and maintenance of sieves for test or nest sieving 12
7.4 Sieving 12
7.5 Determination of mass 17
7.6 Determination of sieving end point 17

8 Verification 18
8.1 General 18
8.2 Checking of division 18
8.3 Verification of sieve media 18
8.4 Verification of sieving machines 18
8.5 Verification of weighing devices 18

9 Results 19
9.1 Evaluation of results 19
9.2 Calculation and expression of results 19
9.3 Repeatability and acceptance of results 20

10 Test report and working log 21
11 Precision 21
11.1 Overall precision, SPM 21

11.2 Precision of preparation and measurement, PM 21

Annex A (informative) Steps for establishing the operating conditions for the determination of size distribution using a single sieve or a nest of sieves 23

Annex B (normative) Scheme of sample preparation and sieving procedure 24

Annex C (normative) Maximum mass to be retained on a sieve at completion of batch sieving (m) in order to obtain good sieving efficiency 25

Annex D (informative) Size apertures in R20 and R40/3 series (taken from ISO 565) 27

Annex E (informative) Typical batch sieving apparatus 28

Annex F (informative) Desirable features of mechanical sieving machines 29

Annex G (normative) Procedure for determining the minimum mass of sample used for sieving 33

Annex H (normative) Flowsheet of the procedure for the acceptance of analytical values for test portions 36

Annex I (informative) Additional information 37

Annex J (normative) Determination of the average particle size (APS) 39
