

ISO 1005-6:1994-08 (E)

Railway rolling stock material - Part 6: Solid wheels for tractive and trailing stock; technical delivery conditions

Contents		Page
1	Scope	1
2	Normative references	1
3	Information to be supplied by the purchaser	2
4	Classification	3
4.1	Grades of steel	3
4.2	Types of heat-treatment condition on delivery	3
4.3	Testing category	3
4.4	Degree of finish	3
4.5	Tolerance category	3
5	Requirements	3
5.1	Chemical composition	3
5.2	Mechanical properties	3
5.3	Appearance and soundness	3
5.4	Machining allowances and dimensional tolerances	3
5.5	Residual imbalance	4
5.6	Marking	4
6	Manufacture	4
6.1	Steelmaking process	4
6.2	Manufacturing process	6
6.3	Removal of defective sections	6
6.4	Identification of the wheels during manufacture	6
6.5	Heat treatment	6
6.6	Machining and correction of imbalance	6
6.7	Removal of surface defects	7
6.8	Shot peening	7
7	Inspection	7
7.1	Responsibilities and type of inspection	7
7.2	Inspection of manufacture	8
7.3	Inspection of the characteristics of the wheels	8
7.4	Submission for inspection by the purchaser	8
7.5	Certification	8
7.6	Number of checks and tests	9
7.7	Sampling and preparation of samples and test pieces	9
7.8	Test methods	11
7.9	Retests	12
7.10	Conclusion of the inspection	12
8	Delivery	12
8.1	Protection against corrosion during transport	12
8.2	Protection against mechanical damage during transport	12
Annexes		
A	Procedure for shot peening web surfaces of wheels	17
B	Bibliography	21
