## Railway rolling stock material - Part 6: Solid wheels for tractive and trailing stock; technical delivery conditions

---

Contents	Page
1 Scope .....	1
2 Normative references.....	1
3 Information to be supplied by the purchaser .....	2
4 Classification .....	3
4.1 Grades of steel.....	3
4.2 Types of heat-treatment condition on delivery .....	3
4.3 Testing category.....	3
4.4 Degree of finish .....	3
4.5 Tolerance category.....	3
5 Requirements.....	3
5.1 Chemical composition .....	3
5.2 Mechanical properties .....	3
5.3 Appearance and soundness .....	3
5.4 Machining allowances and dimensional tolerances .....	3
5.5 Residual imbalance .....	4
5.6 Marking .....	4
6 Manufacture .....	4
6.1 Steelmaking process.....	4
6.2 Manufacturing process .....	6
6.3 Removal of defective sections.....	6
6.4 Identification of the wheels during manufacture .....	6
6.5 Heat treatment .....	6
6.6 Machining and correction of imbalance.....	6
6.7 Removal of surface defects.....	7
6.8 Shot peening.....	7
7 Inspection.....	7
7.1 Responsibilities and type of inspection.....	7
7.2 Inspection of manufacture .....	8
7.3 Inspection of the characteristics of the wheels .....	8
7.4 Submission for inspection by the purchaser .....	8
7.5 Certification.....	8
7.6 Number of checks and tests .....	9
7.7 Sampling and preparation of samples and test pieces .....	9
7.8 Test methods .....	11
7.9 Retests.....	12
7.10 Conclusion of the inspection .....	12
8 Delivery.....	12
8.1 Protection against corrosion during transport .....	12
8.2 Protection against mechanical damage during transport .....	12
Annexes	
A Procedure for shot peening web surfaces of wheels .....	17
B Bibliography .....	21
