DIN EN 10263-2:2018-02 (E)

Steel rod, bars and wire for cold heading and cold extrusion - Part 2: Technica l delivery conditions for steels not intended for heat treatment after cold working

Contents

Page

European foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Classification and designation 4
4.1 Classification 4
4.2 Designation 4
4.2.1 Steel names 4
4.2.2 Steel numbers 4

5 Production process 4
5.1 General 4
5.2 Deoxidation 4

6 Requirements 5
6.1 Delivery condition 5
6.2 Chemical composition 5
6.2.1 Cast analysis 5
6.2.2 Product analysis 5
6.3 Mechanical properties 5
6.4 Surface quality 5
6.5 Supplementary or special requirements 5

Table 1 -- Summary of delivery conditions, product forms and applicable requirements 6

Table 2 -- Chemical composition, cast analysis % by mass a 7

Table 3 -- Permissible deviations between product analysis and the limiting values specified in Table 2 for the heat analysis 8

Table 4 -- Rod, bars and wire not intended for heat treatment after cold working - Mechanical properties 9
