ISO 6934-4:2020 (E)

Steel for the prestressing of concrete — Part 4: Strand

Contents

Foreword

1 Scope

2 Normative reference

3 Terms and definitions

4 Conditions of manufacture

- 4.1 Steel
- 4.2 Stress-relieving heat treatment
- 4.3 Compacted strand
- 4.4 Welds
- 4.4.1 2-wire and 3-wire strand
- 4.4.2 7-wire and 19-wire strand
- 4.5 Cracks
- 4.6 Finishing and appearance

5 Strand configuration

6 Properties

- 6.1 Dimensions, masses and strength of strand
- 6.2 Elongation and ductility
- 6.3 Relaxation
- 6.4 Fatigue
- 6.5 Stress corrosion
- 6.6 Deflected tensile test

7 Designation

8 Delivery conditions

- 8.1 General
- 8.2 Reel dimension
- 8.3 Curvature of strand

Annex A (informative) Considerations on stress corrosion

- A.1 General
- A.2 Reference

Annex B (informative) Deflected tensile strength

- B.1 General
- B.2 Reference
