European foreword 5

1 Scope 7

2 Normative references 7

3 Terms and definitions 9

4 Classification and designation 11
4.1 Classification 11
4.2 Designation 11

5 Information to be supplied by the purchaser 12
5.1 Mandatory information 12
5.2 Options 12
5.3 Example of an order 12

6 Manufacturing process 13
6.1 Steel manufacturing process 13
6.2 Structural hollow section manufacturing process 13
6.3 Qualification of personnel for NDT activities 13
6.4 Delivery condition 13

7 Requirements 13
7.1 General 13
7.2 Chemical composition 14
7.2.1 Heat analysis 14
7.2.2 Product analysis 14
7.2.3 Carbon equivalent values (CEV) and Pcm 14
7.3 Mechanical properties 14
7.3.1 General 14
7.3.2 Post weld heat treatment (PWHT) 14
7.3.3 Through thickness testing 15
7.3.4 Flattening test 15
7.3.5 Prequalification for arctic areas 15
7.4 Weldability data 15
7.5 Internal soundness and non-destructive testing 15
7.5.1 Non-destructive testing of the weld seam of HFW hollow sections 15
7.5.2 Non-destructive testing of seamless hollow sections for longitudinal imperfections 15
7.5.3 Laminar discontinuities of hollow sections 16
7.6 Surface quality 16
7.7 Dimensions, tolerances, mass 16
7.7.1 Dimensions and tolerances on dimensions and shape 16
7.7.2 Mass of steel 16

8 Inspection 17
8.1 General 17
8.2 Types of inspection documents 17
8.3 Summary of inspections 18
8.4 Intermediary supply 18

9 Frequency of testing and preparation of samples and test pieces 18
9.1 Frequency of test 18
9.1.1 Chemical analysis 18
9.1.2 Tensile test and impact test 19
9.1.3 Testing the weld seam of welded hollow sections 19
9.1.4 Testing of the corner regions for rectangular hollow sections 19
9.2 Selection and preparation of samples for product analysis 19
9.3 Location of samples and orientation of tensile test pieces 19
9.4 Location of samples and orientation of impact test pieces 20
9.5 Preparation of test pieces for mechanical tests 20
9.5.1 General 20
9.5.2 Preparation of tensile test pieces 20
9.5.3 Preparation of impact test pieces 20

10 Test methods 21
10.1 Chemical analysis 21
10.2 Mechanical tests 21
10.2.1 Test temperatures 21
10.2.2 Tensile test 21
10.2.3 Impact test 22
10.3 Visual inspection and dimensional check 22
10.4 Non-destructive tests 22
10.4.1 General 22
10.4.2 NDT for the weld seam of HFW hollow sections 22
10.4.3 Full peripheral NDT for seamless hollow sections 23
10.4.4 Ultrasonic testing for laminar imperfections 23
10.4.5 NDT for surface quality 23
10.5 Retests, sorting and reprocessing 23

11 Marking and bundling 23
11.1 Die stamping and paint marking 23
11.2 Bundling 23

12 Options 24

Annex A (normative when Option 1 is specified by the purchaser) Further details of steel manufacturing procedures to be supplied by the manufacturer 37

Annex B (normative when Option 17 is specified by the purchaser) Weldability testing and mechanical testing of butt welds 38

B.1 General requirements 38
B.2 Welding processes and procedure 38
B.3 Butt-weld requirements 39
B.3.1 General 39
B.3.2 Test piece dimensions 39
B.3.3 Bevel detail 40
B.3.4 Welding processes 40
B.3.5 Nominal heat input 40
B.3.6 Heat treatment 41
B.3.7 Dehydrogenation of test pieces 41
B.4 Mechanical testing 42
B.4.1 General 42
B.4.2 Charpy V-notch impact tests 43
B.4.3 Fracture mechanic test 44
B.4.4 Macrohardness 45
B.4.5 Cross-weld tensile test 46

Annex C (normative when Option 17 is specified by the purchaser) Weldability testing - Bead- on-plate 51

C.1 General 51

C.2 Test material dimension 51
C.3 Welding method 51
C.4 Test condition 51
C.5 Specific test requirements: macrosection and hardness tests 52

Annex D (normative when Option 17 is specified by the purchaser) Weldability testing - Controlled thermal severity tests (CTS) 54

D.1 General 54
D.2 Test block dimensions 54
D.3 General welding details 54
D.3.1 Anchor welds 54
D.3.2 Test welds 54
D.4 Evaluation of the test welds 55
D.5 Hardness testing 55

Annex E (informative) Prequalification of steels for offshore structures operating in arctic areas 61
