DIN EN 10348:2024-05 (E)

Steel for the reinforcement of concrete - Galvanized reinforcing steel products

Contents

Page

European foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Symbols 5

5 Materials 6
5.1 Reinforcing steel 6
5.2 Zinc melt 6
5.3 Repair material 6

6 Designation 6

7 Information to be supplied at the time of enquiry and order 6

8 Galvanizing 7
8.1 Coating application 7
8.2 Renovation 7

9 Performance characteristics 7
9.1 Steel mechanical properties 7
9.2 Dimensions, mass per metre and tolerances 7
9.3 Bond strength and surface geometry of the galvanized rebar 7
9.4 Durability 7
9.5 Finish and appearance 8

10 Sampling, testing and evaluation of test result 8
10.1 Sampling and testing 8
10.1.1 Test unit 8
10.1.2 Coating thickness 8
10.1.3 Rib height and indentation depth 8
10.2 Evaluation of test results 9
10.2.1 Rib height and indentation depth 9
10.2.2 Galvanized coating 9
10.2.3 Retest 9

11 Test methods 9
11.1 Rib height and indentation depth 9
11.2 Coating characteristics 10
11.2.1 Magnetic coating thickness measurement method 10
11.2.2 Gravimetric test method 10
11.2.3 Coating uniformity 11

12 Labelling, packaging, handling, storage, transport 11
