Page

Foreword v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principle 2

5 Reagents and materials 2

6 Apparatus 4

7 Sampling and samples 5
7.1 Laboratory sample 5
7.2 Preparation of test samples 5
7.2.1 General 5
7.2.2 Method specified in ISO 2596 5
7.2.3 Method specified in ISO 7764 6

8 Procedure 6
8.1 General 6
8.2 Number of determinations 7
8.3 Check analysis and blank test 7
8.4 Preparation of discs 7
8.4.1 Weighing 7
8.4.2 Mixing 8
8.4.3 Fusion 8
8.4.4 Casting 8
8.4.5 Visual inspection 8
8.4.6 Disc storage 8
8.4.7 Cleaning of platinum ware 9
8.4.8 Test discs 9
8.5 Measurement 9
8.5.1 General 9
8.5.2 Effect of errors or omissions 10
8.5.3 Analytical lines 11
8.5.4 XRF generator settings 11
8.5.5 Crystals 14
8.5.6 Line overlaps 14
8.5.7 Collimators 14
8.5.8 Pulse height settings 14
8.5.9 Counting time 14
8.5.10 Simultaneous instruments 15
8.5.11 Sample holders 15
8.5.12 Measurement sequence 16
8.6 Drift correction 16
8.6.1 Preparation of drift correction monitor discs 16
8.6.2 Drift correction using monitor disc 17

9 Calculation of results 19
9.1 General 19
9.2 Calibration equation 20
9.3 Calculation of alpha coefficient 23
9.4 Correction for sample, flux and oxidizer mass 24
9.4.1 General 24
9.4.2 Correction of flux/sample mass ratio 24
9.4.3 Correction of remaining oxidizer/sample mass ratio 24
9.4.4 Mass ratio correction constant in calibration Equation 1 25
9.5 Calculation of calibration 25

9.5.1 Preparation of calibration discs 25
9.5.2 Calculation of concentrations of calibration discs 28
9.5.3 Measurement of calibration discs 29
9.5.4 Calculation of calibration coefficients 29
9.6 Calculation of concentrations 33
9.6.1 Calculation of flux/sample and remaining oxidizer/sample mass ratios 33
9.6.2 Calculation of initial concentration 34
9.6.3 Calculation of concentrations 34
9.6.4 Conversion from oxide to element concentrations 35

10 General treatment of results 35
10.1 Background equivalent concentration (BEC) 35
10.2 Determination of analytical result 36
10.3 Check for trueness 36
10.4 Calculation of the final result 37
10.5 Oxide factors 38

11 Test report 38

Annex A (normative) Preparation of Flux A and Flux D 39

Annex B (normative) Preparation of Flux B and Flux C 41

Annex C (normative) Standard deviation of specimen preparation 42

Annex D (normative) Spectrometer precision tests 44

Annex E (informative) Theoretical derivation of correction term in calibration 48

Annex F (informative) Calculation of correction coefficients using the FP method (fundamental parameter method) 53

Annex G (informative) Calculation of calibration coefficients and correction alphas by the least square method 56

Annex H (informative) Calculation of counting time 60

Annex I (informative) Air cooling block for fused discs 63

Annex J (normative) Flowchart for acceptance of results 64

Bibliography 65
