# ISO 20915:2026-09 (E)

## Life cycle inventory calculation methodology for steel products

## Contents

Page

Foreword ..... v

Introduction ..... vi

1 Scope ..... 1

2 Normative references ..... 1

3 Terms and definitions ..... 1

4 Basic conditions for LCI of steel products ..... 5
4.1 General requirements ..... 5
4.2 Function and declared unit ..... 5
4.3 System boundary ..... 5
4.4 Data quality ..... 7
4.4.1 General ..... 7
4.4.2 Time-related coverage ..... 7
4.4.3 Geographical coverage ..... 7
4.4.4 Technology coverage ..... 7
4.4.5 Sources of the data ..... 7
4.4.6 Primary data share ..... 8
4.4.7 Data quality rating ..... 8
4.4.8 Cut-off criteria ..... 8

5 Methodological procedure for LCI calculation of steel products with provision for scrap recycling ..... 8
5.1 General ..... 8
5.2 Collecting data ..... 9
5.2.1 General ..... 9
5.2.2 Co-products ..... 9
5.2.3 Ferrous raw materials ..... 11
5.2.4 Process coal ..... 11
5.2.5 Non-ferrous raw materials ..... 12
5.2.6 Ferro alloy ..... 12
5.2.7 Other input materials ..... 12
5.2.8 Fuels ..... 12
5.2.9 Process gases ..... 12
5.2.10 Electricity ..... 13
5.2.11 Steam ..... 13
5.2.12 Sea water ..... 13
5.2.13 Fresh water ..... 13
5.2.14 Grey water ..... 13
5.2.15 Industrial gases ..... 13
5.2.16 Emissions to air, water and soil ..... 14
5.2.17 Flares ..... 14
5.2.18 Transportation ..... 14
5.2.19 Waste for disposal ..... 14
5.2.20 Packaging of steel products ..... 14
5.3 Allocation procedure for co-products ..... 14
5.3.1 General requirement ..... 14
5.3.2 Application of system expansion with substitution to all co-products excluding slags from iron and steel production ..... 14

5.3.3 Exclusions ..... 15
5.4 Calculation of cradle-to-gate LCI without allocation for scrap input ..... 15
5.5 Allocation for scrap recycling ..... 16
5.5.1 General ..... 16
5.5.2 LCI calculation methodology for scrap ..... 16
5.5.3 Calculation of the burden for scrap input to produce the specific steel product under study ..... 16

5.5.4 Calculation of the credits for scrap recovery ..... 17

6 Reporting ..... 17

7 Critical review ..... 18

Annex A (informative) Calculation example of data quality rating ..... 19

Annex B (normative) LCI calculations for electricity, steam and biogenic fuels ..... 20

Annex C (informative) Example uses of co-products outside of the system boundary ..... 22

Annex D (informative) Example for calculating Xpr ..... 23

Annex E (informative) Details for calculating the scrap input rate ..... 26

Annex F (informative) Example of LCI result reporting ..... 28

Annex G (informative) Cross reference table of related standards ..... 35

Bibliography ..... 42
