## Iron ores - Determination of various elements by X-ray fluorescence spectrometry - Part 1: Comprehensive procedure

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 <b>Scope</b> .....		1
2 <b>Normative references</b> .....		2
3 <b>Principle</b> .....		2
4 <b>Reagents and materials</b> .....		2
5 <b>Apparatus</b> .....		6
6 <b>Sampling and samples</b> .....		7
7 <b>Procedure</b> .....		7
8 <b>Calculation of results</b> .....		17
9 <b>General treatment of results</b> .....		20
10 <b>Test report</b> .....		24
Annex A (normative) Preparation of flux A .....		25
Annex B (normative) Preparation of flux B or flux C .....		27
Annex C (normative) Preparation of synthetic calibration standard .....		28
Annex D (normative) Standard deviation of specimen preparation .....		30
Annex E (normative) Spectrometer precision tests .....		35
Annex F (normative) Determination of the dead time and maximum count rate of the equipment .....		39
Annex G (informative) Air cooling block for fused discs .....		46
Annex H (informative) Computer program for calculation of results .....		47
Annex I (informative) Sample of data for use with calculation program .....		60
Annex J (normative) Flowchart for acceptance of results .....		65
