

# DIN EN 10315:2006-10 (E)

## Routine method for analysis of high alloy steel by X-ray Fluorescence Spectrometry (XRF) by using a near by technique

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
1	Scope .....	4
2	Normative references .....	4
3	Principle .....	5
4	Reagents .....	5
5	Apparatus .....	6
6	Safety precautions .....	7
7	Sampling .....	7
8	Final sample preparation .....	7
9	Procedure .....	7
10	Calibration .....	8
11	Standardization .....	9
12	Statistical Process Control (SPC) parameters .....	9
13	"Near by technique" method .....	10
14	Test report .....	10
Annex A (normative) Precision .....		12
Annex B (normative) Graphical representation of precision data .....		17
Bibliography .....		28
