

DIN EN 10315:2006-10 (E)

Routine method for analysis of high alloy steel by X-ray Fluorescence Spectrometry (XRF) by using a near by technique

Contents		Page
Foreword		3
1 Scope		4
2 Normative references		4
3 Principle		5
4 Reagents		5
5 Apparatus		6
6 Safety precautions		7
7 Sampling		7
8 Final sample preparation		7
9 Procedure		7
10 Calibration		8
11 Standardization		9
12 Statistical Process Control (SPC) parameters		9
13 "Near by technique" method		10
14 Test report		10
Annex A (normative) Precision		12
Annex B (normative) Graphical representation of precision data		17
Bibliography		28
