DIN EN ISO 3506-1:2020-08 (E)

Fasteners - Mechanical properties of corrosion-resistant stainless steel fasteners - Part 1: Bolts, screws and studs with specified grades a nd property classes (ISO 3506-1:2020)

Contents

Page

European foreword ... **4**

Foreword ... **5**

Introduction ... **7**

1 Scope ... **8**

2 Normative references ... **9**

3 Terms and definitions ... **9**

4 Symbols ... **10**

5 Designation system for stainless steel grades and property classes ... **11**
5.1 General ... 11
5.2 Designation of stainless steel grades (first block) ... 12
5.3 Designation of property classes (second block) ... 13

6 Materials ... **13**
6.1 Chemical composition ... 13
6.2 Heat treatment for martensitic stainless steel fasteners ... 14
6.3 Finish ... 15
6.4 Corrosion resistance ... 15

7 Mechanical and physical properties ... **15**

8 Applicability of test methods and inspection ... **21**
8.1 Applicability of test methods ... 21
8.2 Loadability of fasteners ... 21
8.2.1 Fasteners with full loadability ... 21
8.2.2 Fasteners which have reduced loadability due to their geometry ... 22
8.3 Manufacturer's inspection ... 23
8.4 Supplier's inspection ... 23
8.5 Purchaser's inspection ... 23
8.6 Delivery of test results ... 24

9 Test methods ... **24**
9.1 Tensile test for fasteners ... 24
9.1.1 General ... 24
9.1.2 Test procedure for the simultaneous determination of R_{mf}, R_{pf}, and A ... 25
9.1.3 Reference test procedure for the determination of stress at 0,2 % non-proportional elongation, R_{pf} ... 26
9.1.4 Alternative test procedure for the determination of elongation, A ... 28
9.1.5 Test results and requirements for tensile strength, R_{mf} ... 29
9.1.6 Test results and requirements for stress at 0,2 % non-proportional elongation, R_{pf} ... 29
9.1.7 Test results and requirements for elongation after fracture, A ... 30
9.2 Tensile test for bolts and screws with reduced loadability due to head design ... 30
9.2.1 General ... 30
9.2.2 Test procedure ... 30
9.2.3 Test results and requirements for ultimate tensile load, F_{mf} ... 30
9.3 Tensile test for fasteners with reduced loadability due to shank design ... 30
9.3.1 General ... 30
9.3.2 Test procedure ... 31
9.3.3 Test results for tensile strength 31

9.4 Wedge tensile test ... 31
9.4.1 General ... 31
9.4.2 Test procedure ... 33
9.4.3 Test results and requirements ... 33
9.5 Torsional test ... 33
9.5.1 General ... 33
9.5.2 Test procedure ... 34
9.5.3 Test results and requirements ... 35
9.6 Hardness test ... 35
9.6.1 General ... 35
9.6.2 Test procedure ... 35
9.6.3 Test results and requirements ... 35

10 Fastener marking and labelling ... 36
10.1 Fastener marking ... 36
10.1.1 General requirements for marking ... 36
10.1.2 Marking of property class for fasteners with full loadability ... 36
10.1.3 Marking of property class for fasteners with reduced loadability ... 36
10.1.4 Additional marking ... 37
10.2 Manufacturer's identification mark ... 37
10.3 Marking on the fasteners ... 37
10.3.1 Hexagon head bolts and screws ... 37
10.3.2 Hexagon socket or hexalobular socket bolts and screws ... 38
10.3.3 Other types of bolts and screws ... 39
10.3.4 Studs (one-end and double-end studs) ... 39
10.3.5 Fully threaded studs ... 40
10.3.6 Left-hand thread marking ... 40
10.4 Marking of the packages (labelling) ... 41

Annex A (informative) **Mechanical properties at elevated temperatures — Application at low temperatures ... 42**
