DIN EN 1568-4:2008-06 (E)

Fire extinguishing media - Foam concentrates - Part 4: Specification for low expansion foam concentrates for surface application to water-miscible liquids

Contents

Page

Foreword 3

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Sediment in the foam concentrate 8

5 Viscosity of the foam concentrate 8

6 pH of the foam concentrate 8

7 Surface tension of the foam solution 8

8 Spreading coefficient of the foam solutions 8

9 Expansion and drainage of foam 9

10 Test fire performance 9

11 Container marking 10

Annex A (informative) Grades of foam concentrate 12

Annex B (normative) Preliminary sampling of foam concentrates 13

Annex C (normative) Determination of percentage sediment 14

Annex D (normative) Determination of Viscosity for pseudo-plastic foam concentrates 15

Annex E (normative) Temperature conditioning of foam concentrates 17

Annex F (normative) Determination of surface tension and spreading coefficient 20

Annex G (normative) Determination of expansion and drainage time 21

Annex H (normative) Determination of test fire performance 26

Annex I (informative) Small scale fire test 30

Annex J (informative) Description of a radiation measurement method 40

Annex K (informative) A-Deviations 44
