DIN EN 54-22:2020-07 (E)

Fire detection and fire alarm systems - Part 22: Resettable line-type heat detectors (includes Amendment A1:2020)

Contents

Page

European foreword 4

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms, definitions and abbreviations 8
3.1 Terms and definitions 8
3.2 Abbreviations 9

4 Product characteristics 9
4.1 General 9
4.2 Nominal activation conditions/sensitivity 11
4.3 Operational reliability 11
4.4 Tolerance to supply voltage 13
4.5 Performance parameters under fire conditions 14
4.6 Durability of nominal activation conditions/sensitivity 14

5 Testing, assessments and sampling methods 16
5.1 General 16
5.2 Test procedures nominal activation conditions/sensitivity 20
5.3 Test procedures operational reliability 21
5.4 Tolerance to supply voltage 22
5.5 Performance parameters under fire conditions 23
5.6 Durability of nominal activation conditions/sensitivity 27

6 Assessment and verification of constancy of performance (AVCP) 48
6.1 General 48
6.2 Type testing 48
6.3 Factory production control (FPC) 50

7 Classification 55

8 Marking, labelling and packaging 55
8.1 General 55
8.2 Marking of sensor control unit 55
8.3 Marking of sensing element 56
8.4 Marking of functional units 56

Annex A (normative) Arrangement of the sensing element in the fire test room 57

A.1 General 57
A.2 Fire test room arrangement 57
A.3 Sensing element outside the fire test room 57

Annex B (normative) Flaming liquid test fires (TF6F, TF6 and TF6S) 59

B.1 General 59
B.2 Arrangement 59

B.3 Ignition 59
B.4 End of test condition 59
B.5 Test validity criteria 60

Annex C (normative) Test arrangement for the sensing element of linear heat detector in the heat tunnel 61

C.1 General 61
C.2 Test arrangement for the sensing element 61

Annex D (informative) Apparatus for mounting of the sensing element of linear heat detector in the heat tunnel 62

D.1 General 62
D.2 Test apparatus 62

Annex E (normative) Mounting of the sensing element of multipoint RLTHD in the heat tunnel 63

E.1 General 63
E.2 Mounting arrangement of multipoint sensing element 63

Annex F (normative) Heat tunnel for response time and response temperature measurements 65

F.1 General 65
F.2 Description of the heat tunnel 65

Annex G (informative) Construction of the heat tunnel 66

G.1 General 66
G.2 Heat tunnel construction 66

Annex H (normative) Test arrangement for vibration tests for sensing element 68

H.1 General 68
H.2 Test setup 68

Annex I (normative) Test apparatus for impact test on the sensing element 69

I.1 General 69
I.2 Test apparatus 69
I.3 Test setup 69

Annex J (informative) Data supplied with resettable line-type heat detectors 72
