

# DIN EN 16925:2019-03 (E)

## Fixed firefighting systems - Automatic residential sprinkler systems - Design, installation and maintenance

---

| <b>Contents</b>   | <b>Page</b> |
|---|-------------|
| European foreword.....  | 5           |
| Introduction .....  | 6           |
| 1 Scope.....  | 7           |
| 2 Normative references.....   | 7           |
| 3 Terms and definitions .....   | 8           |
| 4 Contract planning and documentation.....  | 11          |
| 4.1 General.....  | 11          |
| 4.2 Preliminary stage .....   | 11          |
| 4.3 Consultation .....  | 12          |
| 4.4 Design stage .....  | 13          |
| 5 Extent of residential sprinkler protection.....   | 17          |
| 5.1 Buildings and areas to be protected.....  | 17          |
| 5.2 Permitted exceptions.....   | 17          |
| 5.3 Design Criteria - limited areas within the building that are not residential occupancies. | 19          |
| 5.4 Fire resistant separation .....   | 19          |
| 6 Hydraulic design and pipe layout.....   | 20          |
| 6.1 Hydraulic design criteria.....  | 20          |
| 6.2 Locations of the area of operation — Hydraulic demand.....                                | 20          |
| 6.3 Hydraulic Calculations .....  | 20          |
| 6.4 Pipe layout.....  | 21          |
| 6.5 Flexible Sprinkler Hose.....  | 21          |
| 7 Water supplies .....  | 22          |
| 7.1 Water supply.....   | 22          |
| 7.2 Backflow prevention.....  | 22          |
| 7.3 Maximum water pressure .....  | 22          |
| 7.4 Housing of equipment for water supplies.....  | 22          |
| 7.5 Test facility devices .....   | 22          |
| 8 Type of water supply.....   | 23          |
| 8.1 General.....  | 23          |
| 8.2 Water main.....   | 23          |
| 8.3 Storage tanks .....   | 24          |
| 8.4 Pressure tanks.....   | 26          |
| 9 Residential Sprinkler System Pumps.....   | 26          |
| 9.1 General - All types of residential sprinkler systems.....                                 | 26          |
| 9.2 Compartments for pump sets .....  | 27          |
| 9.3 Temperature requirements .....  | 27          |
| 9.4 Valves and accessories .....  | 27          |
| 9.5 Suction conditions .....  | 27          |
| 9.6 Performance characteristics.....  | 29          |
| 9.7 Electrically driven pump set - All types of residential sprinkler systems .....           | 31          |

|                     |  |    |
|---------------------|--|----|
| 10                  | Installation type and size .....                         | 32 |
| 10.1                | Wet pipe installations.....                              | 32 |
| 10.2                | Dry pipe installations .....                             | 37 |
| 10.3                | Pre-action installations.....                            | 37 |
| 11                  | Spacing and location of sprinklers .....                 | 37 |
| 11.1                | General .....  | 37 |
| 11.2                | Spacing of residential sprinklers.....                   | 38 |
| 11.3                | Distance of residential sprinklers from walls.....       | 39 |
| 11.4                | Deflector position of residential sprinklers .....       | 39 |
| 11.5                | Obstructions in relation to residential sprinklers ..... | 39 |
| 11.6                | Small compartments.....                                  | 46 |
| 12                  | Sprinkler design characteristics and uses.....           | 46 |
| 12.1                | General .....  | 46 |
| 12.2                | Sprinkler types and application.....                     | 46 |
| 12.3                | Sprinkler nominal operating temperatures .....           | 46 |
| 12.4                | Sprinkler rosettes and cover plates.....                 | 47 |
| 13                  | Valves and gauges.....                                   | 48 |
| 13.1                | Control valve set.....                                   | 48 |
| 13.2                | Stop valves.....   | 48 |
| 13.3                | Drain requirements .....                                 | 48 |
| 13.4                | Test valves.....   | 48 |
| 13.5                | Pressure gauges .....                                    | 48 |
| 14                  | Alarms and alarm devices .....                           | 49 |
| 14.1                | System monitoring and alarm transmission .....           | 49 |
| 14.2                | Water flow A alarm .....                                 | 49 |
| 14.3                | Alarm connection .....                                   | 49 |
| 15                  | Pipework.....  | 50 |
| 15.1                | Pipe system .....  | 50 |
| 15.2                | Pipe supports .....                                      | 51 |
| 16                  | Signs, notices and information .....                     | 52 |
| 16.1                | Block plan .....   | 52 |
| 16.2                | Signs and notices.....                                   | 53 |
| 17                  | Commissioning tests.....                                 | 54 |
| 17.1                | General .....  | 54 |
| 17.2                | All pipework .....                                       | 54 |
| 17.3                | Dry pipework .....                                       | 54 |
| 17.4                | Completion certificate and documents.....                | 54 |
| 18                  | Inspection, testing and maintenance.....                 | 55 |
| 18.1                | General .....  | 55 |
| 18.2                | Spare sprinklers.....                                    | 55 |
| 18.3                | Precautions while carrying out work.....                 | 55 |
| 18.4                | Annual inspection.....                                   | 55 |
| 18.5                | Long-term inspections .....                              | 57 |
| Annex A (normative) | Sprinkler system zoning .....                            | 58 |
| A.1                 | General .....  | 58 |
| A.2                 | Guidance for zoned installations .....                   | 58 |

|  |           |
|--|-----------|
| <b>Annex B (normative) Sprinkler system monitoring .....</b>   | <b>59</b> |
| <b>B.1 Type 1 systems .....</b>  | <b>59</b> |
| <b>B.2 Type 2 and 3 systems .....</b>  | <b>59</b> |
| <b>B.3 Functions to be monitored .....</b>   | <b>59</b> |
| <b>Annex C (normative) Transmission of alarms .....</b>  | <b>61</b> |
| <b>C.1 Type 1 systems .....</b>  | <b>61</b> |
| <b>C.2 Type 2 and Type 3 systems .....</b>   | <b>61</b> |
| <b>Annex D (normative) Hydraulic calculations .....</b>  | <b>63</b> |
| <b>D.1 Static pressure .....</b>   | <b>63</b> |
| <b>D.2 Flow from a sprinkler .....</b>   | <b>63</b> |
| <b>D.3 Pipe friction loss .....</b>  | <b>63</b> |
| <b>D.4 Pressure loss through fittings and valves .....</b>   | <b>64</b> |
| <b>D.5 Velocity .....</b>  | <b>66</b> |
| <b>D.6 Accuracy of calculations .....</b>  | <b>66</b> |
| <b>Annex E (normative) Long term inspection and testing of pipework and sprinklers .....</b>         | <b>67</b> |
| <b>Annex F (informative) Special circumstances .....</b>   | <b>68</b> |
| <b>Annex G (informative) Typical water supply arrangements .....</b>                                 | <b>69</b> |
| <b>Annex H (informative) Precautions and procedures when a system is not fully operational .....</b> | <b>72</b> |
| <b>H.1 Minimizing the fire safety risk when a sprinkler system is shut down .....</b>                | <b>72</b> |
| <b>H.2 Planned shut-down .....</b>   | <b>72</b> |
| <b>H.3 Unplanned shut-down .....</b>   | <b>72</b> |
| <b>H.4 Action following sprinkler operation .....</b>  | <b>73</b> |
| <b>Annex I (informative) Hydraulic test .....</b>  | <b>74</b> |
| <b>Annex J (informative) New technology .....</b>  | <b>76</b> |
| <b>Bibliography .....</b>  | <b>77</b> |
