

ISO 6182-4:2019 (E)

Fire protection — Automatic sprinkler systems — Part 4: Requirements and test methods for quick opening devices

Contents

	Foreword
1	Scope
2	Normative references
3	Terms and definitions
4	Requirements
4.1	Rated working pressure
4.2	Leakage test (see 6.4)
4.3	Bodies and covers
4.4	Strength test (see 6.5)
4.5	Components
4.6	Non-metallic components (excluding gaskets, diaphragms and seals)
4.7	Clearances
4.8	Protection of orifices
4.9	Gauge connection
4.10	Operation (see 6.6)
4.11	Equilibrium time (see 6.7)
5	Production testing and quality control
6	Performance tests
6.1	General
6.2	Metallic materials, components (see 4.5.2)
6.3	Non-metallic components (see 4.6)
6.3.1	Air-oven ageing for non-metallic components (excluding gaskets, diaphragms, and seals) normally exposed to air
6.3.2	Warm water ageing for non-metallic components (excluding gaskets, diaphragms, and seals) normally exposed to water
6.4	Leakage test (see 4.2)
6.5	Strength test (see 4.4)
6.6	Operational tests (see 4.10)
6.7	Equilibrium time test (see 4.11)
7	Marking
8	Manufacturer's installation instructions
