|-------------------------|--|-------------|
| European foreword ..... |  | 4           |
| Introduction .....      |  | 5           |
| 1                       | Scope .....  | 6           |
| 2                       | Normative references .....                             | 7           |
| 3                       | Terms and definitions .....                            | 7           |
| 4                       | System requirements .....                              | 9           |
| 4.1                     | General .....  | 9           |
| 4.2                     | Personnel safety .....                                 | 9           |
| 4.3                     | Effectiveness and application .....                    | 10          |
| 4.4                     | Alarm organization and emergency plan .....            | 10          |
| 5                       | Design .....   | 10          |
| 5.1                     | Qualification of the designer .....                    | 10          |
| 5.2                     | Fire protection concept .....                          | 10          |
| 5.3                     | Structural specifications for the protected area ..... | 11          |
| 5.4                     | Oxygen concentration .....                             | 11          |
| 5.5                     | Oxygen reduction to prevent fire .....                 | 12          |
| 5.6                     | Safety margins .....                                   | 12          |
| 5.7                     | Oxygen reduced air quantity .....                      | 16          |
| 5.7.1                   | Continuous oxygen reduction .....                      | 16          |
| 5.7.2                   | Emergency plan .....                                   | 16          |
| 5.7.3                   | Oxygen reduced air .....                               | 16          |
| 5.7.4                   | Gaseous supply .....                                   | 17          |
| 5.7.5                   | Fault signals .....                                    | 17          |
| 5.8                     | Technical areas .....                                  | 18          |
| 5.8.1                   | Technical area for control panel .....                 | 18          |
| 5.8.2                   | Technical area for reduced oxygen air generation ..... | 18          |
| 6                       | Distribution pipework .....                            | 19          |
| 6.1                     | Pipework .....   | 19          |
| 6.2                     | Pipe supports .....                                    | 19          |
| 6.3                     | Components in the pipework .....                       | 19          |
| 7                       | Monitoring the oxygen concentration .....              | 20          |
| 8                       | Alarms and notifications .....                         | 21          |
| 9                       | Control equipment .....                                | 22          |
| 9.1                     | Function .....   | 22          |
| 9.2                     | Requirements .....                                     | 22          |
| 9.3                     | Electrical power supply .....                          | 22          |
| 9.4                     | Electrical installations .....                         | 22          |
| 9.5                     | Data recording .....                                   | 22          |
| 10                      | System operation .....                                 | 23          |
| 10.1                    | Instruction and training of personnel .....            | 23          |

|  |   |           |
|--|---|-----------|
| 10.2   | Inspections .....   | 23        |
| 10.3   | Operations log .....  | 23        |
| 10.4   | Further obligations .....   | 23        |
| 11   | Maintenance .....   | 24        |
| 12   | Documentation .....   | 24        |
| 13   | Installation .....  | 25        |
| 13.1   | Qualification of the installer .....                                    | 25        |
| 13.2   | General specifications, installation .....                              | 25        |
| <b>Annex A(normative) Ignition thresholds for oxygen reduction using nitrogen in fire prevention .....</b>                                   |   | <b>26</b> |
| A.1  | Ignition thresholds .....   | 26        |
| A.2  | Tests to ascertain ignition thresholds of unfamiliar materials .....    | 27        |
| A.2.1  | Cup burner tests .....  | 27        |
| A.2.2  | Ignition threshold tests .....  | 28        |
| A.2.2.1  | General .....   | 28        |
| A.2.2.2  | Test criteria .....   | 29        |
| A.2.2.3  | Test documentation .....  | 29        |
| <b>Annex B(informative) Information for health and safety - Working in oxygen-reduction atmospheres for reasons of fire prevention .....</b> |   | <b>31</b> |
| B.1  | General .....   | 31        |
| B.2  | Principles of occupational health .....                                 | 31        |
| B.3  | Risk classes .....  | 31        |
| B.4  | Basic requirements, planning and installation .....                     | 32        |
| B.5  | Protective measures for all areas with oxygen-reduced atmospheres ..... | 33        |
| B.5.1  | Structural and technical measures .....                                 | 33        |
| B.5.2  | Organizational measures .....   | 34        |
| B.6  | Risk classes and safety measures .....                                  | 35        |
| <b>Annex C(informative) Existing national regulations for access and working in areas with lower oxygen concentration .....</b>              |   | <b>36</b> |
| <b>Bibliography .....</b>  |   | <b>37</b> |
