DIN EN 3-8:2021-10 (E)

Portable fire extinguishers - Part 8: Requirements for the construction, pressure resistance and mechanical tests for extinguishers with a maximum allowable pressure equal to or lower than 30 bar, which comply with the requirements of EN 3-7

European foreword 5

Introduction 7

1 Scope 8

2 Normative references 8

3 Terms and definitions 9

4 Symbols and abbreviations 10

5 Design 10
5.1 Design parameters 10
5.2 General 11
5.3 Bodies 11
5.3.1 General Test Conditions 11
5.3.2 Burst test 11
5.3.3 Crushing test - low temperature (extinguisher bodies only) 12
5.3.4 Macroscopic examination of the extinguisher body 12
5.3.5 Requirements for the base 12
5.3.6 Required for use with plastic components 13
5.4 Fittings (except pressure gauge, as defined in EN 3-7) 13
5.4.1 Conditions 13
5.4.2 Requirements 13
5.5 Pressure gauge 13
5.5.1 Conditions 13
5.5.2 Requirements 13
5.6 Pressure test (test pressure PT) - extinguisher bodies, fittings and assemblies 14
5.6.1 Conditions 14
5.6.2 Requirements - Extinguisher bodies 14
5.6.3 Requirements - Fittings 14
5.6.4 Requirements - Assembly 14
5.7 Overfill pressure test (for water based media cartridge operated extinguishers only) 14
5.7.1 General 14
5.7.2 Conditions 14
5.7.3 Requirements 14
5.8 Plastics components (subject to pressure) except hoses, and nozzles 14
5.9 Resistance to impact 14
5.9.1 Conditions 14
5.9.2 Requirements 14
5.10 Resistance to Corrosion 15
5.10.1 External corrosion 15
5.10.2 Resistance to media 15
5.10.3 Material compatibility 15
5.11 Filling opening 15
5.12 Safety device 15

6 Marking 15

6.1 General ... 15
6.2 Extinguisher body ... 15
6.3 Extinguisher assembly ... 15

7 Manufacturing, Inspection and testing during production ... 16
7.1 General requirements ... 16
7.2 Permanent joining ... 16
7.2.1 Introduction ... 16
7.2.2 Welding procedures ... 16
7.2.3 Brazing procedures ... 16
7.3 Traceability ... 16
7.3.1 Pressure retaining parts ... 16
7.3.2 Operating devices, filling caps and hose assemblies ... 17
7.4 Pressure testing ... 17
7.4.1 Personnel ... 17
7.4.2 Proof testing ... 17
7.5 Burst and crushing tests ... 17
7.5.1 Extinguisher bodies ... 17
7.5.2 Fittings - subject to pressure ... 18
7.6 Final assessment ... 19
7.6.1 Test pressure verification ... 19
7.6.2 Final Inspection ... 19

8 Materials ... 19
8.1 General ... 19
8.2 Pressure bearing parts ... 20
8.3 Non-pressure bearing parts ... 20
8.4 Plastic components ... 20
8.5 Documentation ... 20

9 Propellant gas cartridges ... 20

Annex A (normative) Classification of the different parts of an extinguisher subject to internal pressure ... 21

Annex B (normative) Pressures and temperatures ... 22

B.1 The scheme given in Table B.1 illustrate the definitions of pressure given in Clause 4 ... 22
B.2 The scheme given in Table B.2 illustrate the definitions of temperature given in Clause 4 and in 5.1 ... 22

Annex C (normative) Impact test -- Resistance to impact by falling weight ... 23

C.1 General ... 23
C.2 Apparatus ... 23
C.3 Procedure ... 23

Annex D (normative) Specification for plastics components (except hoses and nozzles) ... 25

D.1 General ... 25
D.2 Requirements for plastics components subject to pressure ... 25
D.2.1 General ... 25
D.2.2 Burst under pressure ... 25
D.2.3 Temperature conditioning at TSmax ... 26
D.2.4 Ageing test - Xenon arc ... 26
D.2.5 Impact test after ageing at 20 °C ... 26
D.2.6 Plastic/metal thread design ... 27

Annex E (normative) Propellant gas cartridges - Marking ... 29

Annex F (normative) Overfill pressure test ... 30

Annex G (normative) Mechanical strength test (crushing test) 31

G.1 General 31
G.2 Long bodies 31
G.3 Short bodies 32

Annex H (normative) Materials - Quality control documents 34

Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2014/68/EU aimed to be covered 35
