## Gaseous fire-extinguishing systems - Physical properties and system design - Part 1: General requirements

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | vi          |
| Introduction ..... |  | viii        |
| 1                  | Scope .....                                    | 1           |
| 2                  | Normative references .....                     | 2           |
| 3                  | Terms and definitions .....                    | 3           |
| 4                  | Use and limitations .....                      | 6           |
| 4.1                | General .....                                  | 6           |
| 4.2                | Extinguishants .....                           | 6           |
| 4.2.1              | General .....                                  | 6           |
| 4.2.2              | Environmental properties .....                 | 7           |
| 4.3                | Electrostatic discharge .....                  | 7           |
| 4.4                | Compatibility with other extinguishants .....  | 7           |
| 4.5                | Temperature limitations .....                  | 7           |
| 5                  | Safety .....                                   | 8           |
| 5.1                | Hazard to personnel .....                      | 8           |
| 5.2                | Safety precautions .....                       | 8           |
| 5.2.1              | General .....                                  | 8           |
| 5.2.2              | For normally occupied areas .....              | 9           |
| 5.2.3              | For normally unoccupied areas .....            | 10          |
| 5.2.4              | For unoccupiable areas .....                   | 10          |
| 5.3                | Occupiable areas .....                         | 10          |
| 5.4                | Electrical hazards .....                       | 11          |
| 5.5                | Electrical earthing .....                      | 12          |
| 5.6                | Electrostatic discharge .....                  | 12          |
| 6                  | System design .....                            | 12          |
| 6.1                | General .....                                  | 12          |
| 6.2                | Extinguishant supply .....                     | 12          |
| 6.2.1              | Quantity .....                                 | 12          |
| 6.2.2              | Quality .....                                  | 12          |
| 6.2.3              | Container arrangement .....                    | 12          |
| 6.2.4              | Storage containers .....                       | 13          |
| 6.3                | Distribution .....                             | 14          |
| 6.3.1              | General .....                                  | 14          |
| 6.3.2              | Piping .....                                   | 15          |
| 6.3.3              | Fittings .....                                 | 15          |
| 6.3.4              | Pipe and valve supports .....                  | 15          |
| 6.3.5              | Valves .....                                   | 16          |
| 6.3.6              | Nozzles .....                                  | 16          |
| 6.3.7              | Pressure reducing orifice assembly .....       | 17          |
| 6.4                | Detection, actuation and control systems ..... | 17          |
| 6.4.1              | General .....                                  | 17          |
| 6.4.2              | Automatic detection .....                      | 17          |
| 6.4.3              | Operating devices .....                        | 18          |
| 6.4.4              | Control equipment .....                        | 18          |

|        |   |    |
|--------|---|----|
| 6.4.5  | Operating alarms and indicators .....               | 19 |
| 6.4.6  | Hold switches .....                                 | 19 |
| 7      | Extinguishant system design .....                   | 19 |
| 7.1    | General .....                                       | 19 |
| 7.2    | Specifications, plans and approvals .....           | 19 |
| 7.2.1  | Specifications .....                                | 19 |
| 7.2.2  | Working documents .....                             | 19 |
| 7.3    | System flow calculations .....                      | 20 |
| 7.3.1  | General .....                                       | 20 |
| 7.3.2  | A balanced and unbalanced system .....              | 20 |
| 7.3.3  | Friction losses .....                               | 21 |
| 7.3.4  | Pressure drop .....                                 | 21 |
| 7.3.5  | Elevation changes .....                             | 22 |
| 7.3.6  | Valves and fittings .....                           | 22 |
| 7.3.7  | Piping length .....                                 | 22 |
| 7.3.8  | Drawings .....                                      | 22 |
| 7.3.9  | Liquefied gases -- Specific requirements .....      | 22 |
| 7.4    | Enclosures .....                                    | 22 |
| 7.5    | Effects of noise .....                              | 22 |
| 7.6    | Extinguishant concentration requirements .....      | 23 |
| 7.6.1  | Flame extinguishment .....                          | 23 |
| 7.6.2  | Inerting .....                                      | 24 |
| 7.7    | Total flooding quantity .....                       | 25 |
| 7.7.1  | General .....                                       | 25 |
| 7.7.2  | Liquefied gases .....                               | 25 |
| 7.7.3  | Non-liquefied gas .....                             | 25 |
| 7.8    | Altitude adjustment .....                           | 26 |
| 7.9    | Duration of protection .....                        | 26 |
| 7.10   | System performance .....                            | 27 |
| 7.10.1 | Discharge time .....                                | 27 |
| 7.10.2 | Extended discharge .....                            | 27 |
| 8      | Commissioning and acceptance .....                  | 27 |
| 8.1    | General .....                                       | 27 |
| 8.2    | Tests .....   | 27 |
| 8.2.1  | General .....                                       | 27 |
| 8.2.2  | Enclosure check .....                               | 27 |
| 8.2.3  | Review of mechanical components .....               | 28 |
| 8.2.4  | Review of enclosure integrity .....                 | 29 |
| 8.2.5  | Review of electrical components .....               | 29 |
| 8.2.6  | Preliminary functional tests .....                  | 30 |
| 8.2.7  | System functional operational test .....            | 30 |
| 8.2.8  | Remote monitoring operations (if applicable) .....  | 31 |
| 8.2.9  | Control panel primary power source .....            | 31 |
| 8.2.10 | Completion of functional tests .....                | 31 |
| 8.3    | Completion certificate and documentation .....      | 31 |
| 9      | Inspection, maintenance, testing and training ..... | 31 |
| 9.1    | General .....                                       | 31 |
| 9.2    | Inspection .....                                    | 32 |
| 9.2.1  | General .....                                       | 32 |
| 9.2.2  | Container .....                                     | 32 |
| 9.2.3  | Hose .....  | 32 |
| 9.2.4  | Enclosures .....                                    | 32 |
| 9.3    | Maintenance .....                                   | 33 |
| 9.3.1  | General .....                                       | 33 |
| 9.3.2  | User's programme of inspection .....                | 33 |
| 9.3.3  | Service schedule .....                              | 33 |
| 9.4    | Training .....                                      | 33 |

|  |            |
|--|------------|
| <b>Annex A (normative) Working documents .....</b>   | <b>34</b>  |
| <b>Annex B (normative) Determination of flame-extinguishing concentration of gaseous<br/>extinguishants by the cup burner method .....</b>       | <b>36</b>  |
| <b>Annex C (normative) Fire extinguishment/area coverage fire test procedure for engineered and<br/>pre-engineered extinguishing units .....</b> | <b>42</b>  |
| <b>Annex D (informative) Method of evaluating inerting concentration of a fire extinguishant .....</b>   | <b>71</b>  |
| <b>Annex E (normative) Door fan test for determining of minimum hold time .....</b>  | <b>74</b>  |
| <b>Annex F (informative) System performance verification .....</b>   | <b>90</b>  |
| <b>Annex G (normative) Safe personnel exposure guidelines .....</b>  | <b>91</b>  |
| <b>Annex H (informative) Flow calculation implementation method and flow calculation verification<br/>and testing for approvals .....</b>        | <b>99</b>  |
| <b>Annex I (informative) Scaling factors for Class B fuels other than heptane .....</b>  | <b>103</b> |
| <b>Annex J (normative) Criteria for assessment of new extinguishants for inclusion in the ISO 14520<br/>series .....</b>                         | <b>104</b> |
| <b>Bibliography .....</b>  | <b>106</b> |
