ISO/TS 22360:2024-08 (E)

Security and resilience - Crisis management - Concepts, principles and framework

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 Principles 3
4.1 Guiding principles relating to crises 3
4.2 Principle 1: Crisis is contextual 4
4.3 Principle 2: Crisis control is dependent upon a systems approach 4
4.4 Principle 3: The all-hazards approach informs crisis preparedness 4
4.5 Principle 4: Crisis management is a core capability 4
4.6 Principle 5: Crises can present threat and opportunity 4

5 Crisis framework 5
5.1 The role of crisis analysis 5
5.2 Structural and functional elements of a crisis 5
5.3 Framework factors and elements 5

6 Classificationofcrises 7
6.1 No crises are the same 7
6.2 Source of crisis 7
6.3 Crisis participants 8
6.3.1 General 8
6.3.2 Primary initiator or contributor 8
6.3.3 Crisis respondents 8
6.3.4 Third-party adversary 9
6.3.5 Interested party participant 9
6.4 Crises by extent of impact and contagion effects 9
6.5 Classifying sources of crises from natural hazards 10

7 Characteristics of crises 10
7.1 Characteristics as a source of knowledge 10
7.2 Common features and qualities 11
7.3 Characteristics of a crises in a vulnerable systems state 11
7.4 Characteristics of a crises in a defective systems state 12
7.5 Characteristics of crises in a failed systems state 13
7.6 Characteristics of an effective crisis response 13
7.6.1 General 13
7.6.2 Identification and assessment 13
7.6.3 Crisis intervention 14
7.6.4 Crisis communication 14
7.6.5 Decisive critical control point actions 14
7.6.6 Crisis recovery and restoration 14

8 The development of crisis conditions 14
8.1 Transition from a state of normal functioning 14
8.2 State of vulnerability 14

8.3 Defective and failed state 15
8.4 The progression of crises 15
8.4.1 Origins of crises 15
8.4.2 Issues and problems 15
8.4.3 Incidents 16
8.4.4 Emergencies 16
8.4.5 Disasters 16
8.4.6 The evolution of a crisis 16

9 Crises - An integrated social-ecological system 16
9.1 Changes in context - the source of initiating events 16
9.2 Systems affected by change 17
9.3 Positive and negative influences of change 18
9.4 Abnormal or extraordinary events 18
9.5 Issue management 18
9.6 Initiating events 18
9.7 Issue, incident, emergency (non-linear relationships) 19
9.8 Resolution or escalation 19
9.9 Decisive (tipping) point 19

Annex A (informative) Crisis taxonomy: Family of crisis related standards 21

Annex B (informative) Crisis concepts 23
