Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Design of a shelter 2
4.1 Design process 2
4.2 Design criteria 3
4.2.1 Hazards 3
4.2.2 General parameters 4
4.2.3 Type and purpose of a shelter 4
4.2.4 Location 5
4.3 Shelter sections and layout design 5
4.3.1 General 5
4.3.2 Entrance and exit passages 6
4.3.3 Living section 7
4.3.4 Service section 8
4.3.5 Technical section 9
4.4 Structural design 10
4.4.1 General 10
4.4.2 Calculation of the loads 11
4.4.3 Bedrock and concrete shelters 11
4.5 Heating, ventilation, air conditioning (HVAC) and other mechanical systems 12
4.5.1 Ventilation and air conditioning 12
4.5.2 Water supply and sewage 13
4.6 Electrical and electronic systems 13
4.6.1 Power generation 13
4.6.2 External communication 13
4.6.3 Internal communication 13
4.6.4 Situational awareness 13
4.6.5 Intentional electromagnetic interference IEMI (EMP and HPM) protection 13
4.6.6 Monitoring and control 13
4.7 Shelter protective equipment 14
4.7.1 General 14
4.7.2 Blast protection 14
4.7.3 Gas tightness 14
4.7.4 Tightness of penetrations 15
4.7.5 Ground shock isolation 15
4.7.6 CBRN protection 15
4.7.7 Removal of carbon dioxide and addition of oxygen 16
4.8 Safety and security 16
4.8.1 Physical safety and security 16
4.8.2 Fire safety 16

5 Commissioning of a shelter 17

6 Use and maintenance of a shelter 17

6.1 Sheltering cycle 17
6.2 Normal time use 18
6.3 Activation period - preparing the shelter for crisis time use 18
6.4 Crisis time - use of the shelter in various sheltering modes 19
6.5 Deactivation period - preparing the shelter for normal time use 19
6.6 Modifications and alterations during the service life of a shelter 19

Annex A (informative) Sheltering modes 20

Annex B (informative) Examples of shelters 23
