Fire detection and alarm systems - Part 2: Control and indicating equipment

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		2
4 General requirements		4
5 General requirements for indications		4
6 Quiescent condition		5
7 Fire alarm condition		6
8 Supervisory signal condition -- Optional function		10
9 Fault warning condition (see also Annex F)		12
10 Disabled condition -- Optional function		15
11 Test condition -- Optional function		16
12 Standardized input/output interface -- Optional function (see also Annex H)		17
13 Design requirements		18
14 Additional design requirements for software-controlled control and indicating equipment		22
15 Marking		23
16 Tests		24
Annex A (informative) Explanation of access levels		34
Annex B (informative) Optional functions with requirements and alternatives		36
Annex C (informative) Processing of signals from fire detectors		37
Annex D (informative) Explanation of zones and zonal indication of fire alarms		38
Annex E (informative) Delays to outputs		39
Annex F (informative) Systems related to the supervisory signal condition		41
Annex G (informative) Fault recognition and indication		42

Annex H (informative) Standardized input/output interface for the connection of ancillary equipment (e.g. fire brigade panel)	43
Annex I (informative) Integrity of transmission paths	44
Annex J (informative) Design requirements for software-controlled control and indicating equipments	45
