

DIN EN 15821:2011-01 (E)

Multi-firing sauna stoves fired by natural wood logs - Requirements and test methods

Contents		Page
Foreword		4
Introduction		5
1 Scope		5
2 Normative references		6
3 Terms and definitions		6
4 Crashworthiness design categories of railway vehicles		8
5 Design collision scenarios		9
6 Structural passive safety		11
6.1 General principles		11
6.2 Overriding		12
6.2.1 Requirements		12
6.2.2 Explanatory notes (informative)		12
6.3 Survival space, intrusion and egress		13
6.3.1 Requirements		13
6.3.2 Explanatory notes (informative)		14
6.4 Deceleration limit/collision pulse		14
6.4.1 Requirement		14
6.4.2 Explanatory notes (informative)		15
6.5 Obstacle deflector		15
6.5.1 Requirement		15
6.5.2 Explanatory notes (informative)		16
7 Validation of crashworthiness		17
Annex A (informative) Parameters of design collision scenarios		19
A.1 Introduction		19
A.2 Determining the design collision scenarios for collision risks which differ from the normal European operations		20
A.2.1 Design collision scenarios		20
A.2.2 Risk analysis		20
A.2.3 Factors to be considered in the risk assessment		21
A.2.4 Collisions following derailment		21
A.2.5 Bibliography of relevant accident information		22
Annex B (normative) Requirements of a validation programme		23
B.1 Test specifications		23
B.1.1 Test programme		23
B.1.2 Acceptance criteria for calibration/validation tests		23
B.2 Numerical simulations		24
B.2.1 Numerical model validation		24
B.2.2 Simulation modelling		24
Annex C (normative) Reference obstacle definitions		26
C.1 80 t wagon		26
C.2 C-III Reference obstacle		27
C.3 Large deformable obstacle		29
C.4 C-IV Corner collision obstacle		31

Annex D (normative) Reference train definitions – Defined formations	32
D.1 Reference trains for locomotive, power head, driving trailer and coach design.....	32
D.2 Locomotive design	32
D.3 Power head and driving trailer design	32
D.4 Individual coach design	33
Annex E (informative) Migration rule for this European Standard	35
Annex ZA (informative) \square_{A1} Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC of the European Parliament and of the Council of 17 June 2008 on the interoperability of the rail system within the Community (Recast) \square_{A1}	36
Bibliography	39

Figures

Figure 1 — Example for clearance requirement of crumple zones in areas of temporary occupation (e.g. vestibule)	13
Figure 2 — Driver's seat clearance zone.....	14
Figure 3 — Obstacle deflector load application	16
Figure C.1 — Buffered wagon interface	26
Figure C.2 — Wagon buffer characteristic.....	27
Figure C.3 — Peri-urban tram obstacle	28
Figure C.4 — Coupler characteristic	28
Figure C.5 — Deformable obstacle geometry.....	30
Figure C.6 — Deformable obstacle stiffness	30
Figure C.7 — Tram corner collision obstacle	31
Figure D.1 — Locomotive reference train	32
Figure D.2 — Power head/driving trailer reference train	33
Figure D.3 — Coach simplified assessment.....	34

Tables

Table 1 — Crashworthiness design categories of railway vehicles.....	8
Table 2 — Collision scenarios and collision obstacles.....	10
Table 3 — Obstacle deflector performance requirements	11
Table ZA.1 — Correspondence between this European Standard, the HS TSI RST published in the OJEU dated 26 March 2008 and Directive 2008/57/EC	37
Table ZA.2 — Correspondence between this European Standard, the CR LOC and PASS RST TSI (final draft Rev 4.0 dated 24 November 2009) and Directive 2008/57/EC	38
