DIN EN 14829:2007-11 (E)

Independent gas-fired flueless space heaters for nominal heat input not exceeding 6 kW

Contents

Page

Foreword 7

1 Scope 8

2 Normative references 8

3 Terms and definitions 9

4 Classification 15
4.1 Classification of gases 15
4.2 Categories of appliances 15
4.2.1 General 15
4.2.2 Category I 16
4.2.3 Category II 16

5 Constructional requirements 17
5.1 General 17
5.1.1 Conversion to different gases 17
5.1.2 Materials and method of construction 18
5.1.3 Accessibility for use and maintenance 18
5.1.4 Connections 19
5.1.5 Soundness of the gas circuit assembly 19
5.1.6 Electrical equipment 20
5.1.7 Safety in the event of fluctuation, interruption and restoration of the auxiliary energy 20
5.1.8 Appliance stability and fixing 20
5.1.9 Dress guards 20
5.1.10 Confirmation of operation 20
5.2 Adjusting, control and safety devices 21
5.2.1 General 21
5.2.2 Injectors and gas rate adjusters 21
5.2.3 Aeration adjusters 22
5.2.4 Shut-off valves 22
5.2.5 Flame supervision devices 23
5.2.6 Pressure regulators 23
5.2.7 Thermostats 24
5.2.8 Atmosphere sensing device 24
5.3 Ignition devices 24
5.3.1 General 24
5.3.2 Ignition burners 25
5.4 Flame supervision systems (Appliances with automatic burner systems only) 25
5.5 Ignition burner or start-gas flame establishment 25
5.5.1 Appliances with non-automatic burner systems 25
5.5.2 Appliances with automatic burner systems 25
5.6 Main flame establishment 25
5.6.1 General 25
5.6.2 Appliances with non-automatic burner systems 25
5.6.3 Appliances with automatic burner systems 26
5.6.4 Direct establishment of the main flame 26
5.7 Burners 26
5.7.1 General 26
5.7.2 Pan burners 26

5.8 Fan to assist in the distribution of heat 26
5.9 Pressure test points 26

6 Operational requirements 27
6.1 General 27
6.2 Soundness 27
6.3 Heat inputs 27
6.3.1 Nominal heat input 27
6.3.2 Reduced rate heat input 27
6.4 Temperature of various parts of the appliance 27
6.4.1 Temperature of external parts of the appliance 27
6.4.2 Temperature of components 28
6.4.3 Temperature of floor, shelf and walls 28
6.5 Ignition and cross-lighting 28
6.5.1 General 28
6.5.2 Construction integrity test on glass fronted appliances 28
6.6 Flame stability 28
6.7 Pressure regulators 28
6.8 Combustion 29
6.8.1 Reference gas 29
6.8.2 Limit gas 29
6.8.3 Appliances fitted with a fan to assist in the evacuation of the products of combustion 29
6.8.4 Normal and abnormal voltage fluctuation 29
6.8.5 Measurement of nitrogen dioxide (NO2) 29
6.8.6 Values to be used in Annex G 29
6.9 Sooting 29
6.9.1 Cold condition 29
6.9.2 Hot condition 30
6.10 Atmosphere sensing device 30
6.11 Flame supervision devices 30
6.11.1 Thermoelectric device 30
6.11.2 Automatic burner control system 30

7 Test methods 30
7.1 General 30
7.1.1 Characteristics of test gases: reference and limit gases 30
7.1.2 Conditions for preparation of the test gases 31
7.1.3 Practical application of test gases 31
7.1.4 Test pressures 31
7.1.5 General test conditions 32
7.2 Appliance stability and fixing 33
7.3 Soundness of the gas circuit 33
7.4 Heat inputs 33
7.4.1 Nominal heat input 33
7.4.2 Reduced rate 35
7.5 Temperature of various parts of the appliance 35
7.5.1 General 35
7.5.2 Temperature of external parts of the appliance 35
7.5.3 Temperature of components 35
7.5.4 Temperature of floor, shelf and walls 36
7.6 Ignition and cross-lighting 36
7.6.1 General 36
7.6.2 Ignition performance 37
7.6.3 Crosslighting 37
7.6.4 Supplementary tests 38
7.7 Flame stability 38
7.7.1 Lift 38
7.7.2 Light back 38
7.7.3 Resistance to draught 38
7.8 Pressure regulators 39
7.8.1 Operational pressure regulator 39
7.8.2 Pressure regulator out of service 39

7.9 Combustion 39
7.9.1 General 39
7.9.2 Combustion when tested in an atmosphere with approximately normal level of oxygen ... 40
7.9.3 Normal and abnormal voltage fluctuation 42
7.9.4 Nitrogen dioxide (NO2) 43
7.10 Sooting 44
7.10.1 General 44
7.10.2 Determination of the smoke number 44
7.10.3 Test conditions 44
7.11 Atmosphere sensing devices 45
7.11.1 All appliances 45
7.11.2 Blockage of combustion gases for closed fronted appliances 45
7.12 Flame supervision device 45
7.12.1 Thermoelectric device 45
7.12.2 Automatic burner control systems 46

8 Marking and instructions 46
8.1 Data plate 46
8.2 Other marking 47
8.2.1 General 47
8.2.2 Warning labels 47
8.3 Marking of the packaging 47
8.4 Utilization of symbols on the appliance and packaging 48
8.4.1 Electrical supply 48
8.4.2 Type of gas 48
8.4.3 Gas supply pressure 48
8.4.4 Country of destination 48
8.4.5 Category 49
8.4.6 Other information 49
8.5 Instructions 49
8.5.1 General 49
8.5.2 Instructions for use, and user maintenance 49
8.5.3 Technical instructions for installation and maintenance 50
8.5.4 Additional information 51

Figure 3 - Example of combustion products collecting device 54

Annex A (informative) National situations 55

A.1 General 55
A.2 Marketing in different countries of the categories listed in the text of the standard 55
A.3 Supply pressures for the appliances corresponding to the categories given in A.2 57
A.4 Special categories marketed nationally or locally 59
A.4.1 General 59
A.4.2 Definition of special categories 60
A.4.3 Gas rate adjusters, aeration adjusters and regulators 62
A.4.4 Conversion to different gases 62
A.5 Test gases corresponding to the special categories given in A.4 62
A.6 Gas connections in the various countries 65

Annex B (informative) Gas valve arrangements for automatic controls for automatic control 66

Annex C (informative) Means of identification of the types of gas in use in the various countries 67

Annex D (normative) Apparatus for the determination of the smoke number 68

D.1 Pump 68
D.2 Sampling tube 68
D.3 Filter paper 68
D.4 Grey scale 68

Annex E (normative) Dress guards 70

E.1 Scope ... 70
E.2 Requirements ... 70
E.2.1 Access ... 70
E.2.2 Strength ... 70
E.3 Tests ... 70
E.3.1 Access ... 70
E.3.2 Strength ... 71

Annex F (normative) Vitiation room ... 73

F.1 Dimensions ... 73
F.2 Sealing requirement ... 73
F.3 Construction ... 73

Annex G (normative) Room size and ventilation ... 75

G.1 General ... 75
G.2 Room size ... 75
G.2.1 General ... 75
G.2.2 Maximum allowable gas input with regard to CO emissions ... 76
G.2.3 Maximum allowable gas input with regard to NO2 emissions ... 76
G.2.4 Calculation of minimum room size ... 77
G.2.5 Ventilation ... 77

Annex H (informative) A-deviation ... 78

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 90/396/EEC ... 79

Bibliography ... 81
