| Foreword .....  |                                 | iv          |
| Introduction .....  |                                 | v           |
| 1   | Scope .....                     | 1           |
| 2   | Normative references .....      | 1           |
| 3   | Terms and definitions .....     | 1           |
| 4   | Symbols .....                   | 2           |
| 5   | Principle .....                 | 2           |
| 6   | Test parameters .....           | 3           |
| 7   | Materials .....                 | 3           |
| 8   | Apparatus .....                 | 3           |
| 9   | Test-pipe preparation .....     | 7           |
| 10  | Conditioning and backfill ..... | 7           |
| 11  | Test procedure .....            | 8           |
| 12  | Validity of results .....       | 8           |
| 13  | Test report .....               | 9           |
| Annex A (normative) Determination of critical pressure (or hoop stress) ..... |                                 | 10          |
| Annex B (normative) Determination of critical temperature .....               |                                 | 13          |
| Bibliography .....  |                                 | 14          |
