

DIN EN ISO 11357-1:2010-03 (E)

Plastics - Differential scanning calorimetry (DSC) - Part 1: General principles (ISO 11357-1:2009)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Basic principles	12
4.1	General	12
4.2	Heat-flux DSC	12
4.3	Power-compensation DSC	12
5	Apparatus and materials	13
6	Specimen	14
7	Test conditions and specimen conditioning	15
7.1	Test conditions	15
7.2	Conditioning of specimens	15
8	Calibration	15
8.1	General	15
8.2	Calibration materials	16
8.3	Temperature calibration	16
8.4	Heat calibration	18
8.5	Heat flow rate calibration	19
9	Procedure	21
9.1	Setting up the apparatus	21
9.2	Loading the specimen into the crucible	21
9.3	Insertion of crucibles into the instrument	22
9.4	Performing measurements	22
9.5	Post-run checks	24
10	Test report	25
Annex A (normative)	Extended, high-precision, temperature calibration[11]	26
Annex B (normative)	Extended, high-precision, heat calibration	28
Annex C (informative)	Recommended calibration materials	30
Annex D (informative)	Interaction of calibration materials with different crucible materials	33
Annex E (informative)	General recommendations	34
Bibliography		35
