DIN EN 1847:2010-04 (E)

Flexible sheets for waterproofing_- Plastics and rubber sheets for roof waterproofing_- Methods for exposure to liquid chemicals, including water

Contents

		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Principle	6
5	Apparatus	6
5.1	Container	6
5.2	Enclosure	6
5.3	Thermometer	6
5.4	Weighing bottle	7
5.5	Balance	7
5.6	Ventilated oven	7
6	Sampling	7
7	Preparation of test specimens	7
8	Procedure	7
8.1	Test liquids	7
8.2	Temperature	8
8.3	Exposure durations	8
8.4	Immersion procedure	8
8.4.1	Quantity of test liquid	8
8.4.2	Positioning of specimens	8
8.4.3	Rinsing and wiping	9
8.5	Determination of changes in mass	9
8.5.1	Test specimen	9
8.5.2	Initial value	9
8.5.3	Exposure	9
8.5.4	Measurement of mass	9
8.6	Determination of changes in appearance	10
8.6.1	Test specimen	10
8.6.2	Exposure	10
8.6.3	Procedure	10
8.7	Determination of changes in tensile properties	10
8.7.1	General	11
8.7.2	Test specimen	11
8.7.3	Initial value	11
8.7.4	Exposure	11
8.7.5	Follow up test	11
9	Expression of results	11
9.1	Changes in mass	11
9.1.1	Change in mass	11
9.1.2	Change in mass per unit area	12
9.1.3	Percentage change in mass	12
9.1.4	Mean value	12
9.2	Change in appearance	12
9.3	Changes in physical properties	12
9.3.1	Change in tensile properties (strength and elongation)	12

9.3.2 Percentage change of measurable physical property 13
9.3.3 Documentation of change in property 13

10 Test report 13

11 General comments 13

Annex A (informative) **Calibration of apparatus 15**
A.1 Temperature calibration 15
A.2 Ventilation conditions 15
