## Thermoplastics fittings - Determination of ring stiffness

---

| <b>Contents</b>   |                                     | <b>Page</b> |
|---|-------------------------------------|-------------|
| Foreword .....  |                                     | iv          |
| 1   | Scope .....                         | 1           |
| 2   | Terms and definitions .....         | 1           |
| 3   | Symbols .....                       | 3           |
| 4   | Principle .....                     | 3           |
| 5   | Apparatus .....                     | 3           |
| 6   | Test pieces .....                   | 4           |
| 6.1   | Preparation .....                   | 4           |
| 6.2   | Number .....                        | 5           |
| 6.3   | Determination of dimensions .....   | 5           |
| 6.4   | Age .....                           | 7           |
| 7   | Conditioning .....                  | 8           |
| 8   | Test temperature .....              | 8           |
| 9   | Procedure .....                     | 8           |
| 10  | Calculation of ring stiffness ..... | 10          |
| 11  | Test report .....                   | 11          |
| Annex A (informative) Comments on the use of this test method ..... |                                     | 12          |
| Bibliography .....  |                                     | 14          |
