

# ISO 15114:2014-05 (E)

## Fibre-reinforced plastic composites - Determination of the mode II fracture resistance for unidirectionally reinforced materials using the calibrated end-loaded split (C-ELS) test and an effective crack length approach

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Symbols and abbreviated terms .....	1
4	Principle .....	2
5	Apparatus .....	2
6	Specimens .....	4
6.1	Preparation of specimens .....	4
6.2	The initial defect .....	4
6.3	Attaching the load-block to the specimen .....	4
6.4	Moisture conditioning .....	5
6.5	Final specimen preparation and measuring dimensions .....	5
6.6	Number of specimens .....	6
7	Procedure .....	6
7.1	Performing the calibration of the ELS fixture .....	6
7.2	Pre-cracking the specimens .....	7
7.3	Testing the samples in mode II from the precrack formed in 7.2 .....	8
8	Data analysis .....	8
8.1	The points for data analysis .....	8
8.2	Determination of the ELS clamp correction .....	10
8.3	Determination of GIIC values .....	11
9	Precision .....	13
10	Test report .....	14
Annex A (informative) Large displacement and load-block correction factors .....		16
Bibliography .....		18
