## Plastics - Determination of burning behaviour by oxygen index - Part 2: Ambient-temperature test

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | v           |
| Introduction ..... |  | vi          |
| 1                  | Scope .....  | 1           |
| 2                  | Normative references .....   | 1           |
| 3                  | Terms and definitions .....  | 1           |
| 4                  | Principle .....  | 2           |
| 5                  | Apparatus .....  | 2           |
| 5.1                | Test chimney .....   | 2           |
| 5.2                | Test specimen holder .....   | 2           |
| 5.3                | Gas supplies .....   | 6           |
| 5.4                | Gas control devices .....  | 7           |
| 5.5                | Oxygen analyser .....  | 7           |
| 5.6                | Flame igniter .....  | 7           |
| 5.7                | Timing device .....  | 7           |
| 5.8                | Fume extraction system .....                                       | 8           |
| 5.9                | Tool for preparing rolled film .....                               | 8           |
| 6                  | Calibration of equipment .....                                     | 8           |
| 7                  | Preparation of test specimens .....                                | 8           |
| 7.1                | Sampling .....   | 8           |
| 7.2                | Test specimen dimensions and preparation .....                     | 9           |
| 7.3                | Marking of test specimens .....                                    | 11          |
| 7.3.1              | General .....  | 11          |
| 7.3.2              | Marks for testing by top surface ignition .....                    | 11          |
| 7.3.3              | Marks for testing by propagating ignition .....                    | 11          |
| 7.4                | Conditioning .....   | 11          |
| 8                  | Procedure for determination of oxygen index .....                  | 12          |
| 8.1                | General .....  | 12          |
| 8.2                | Setting up the apparatus and test specimen .....                   | 12          |
| 8.3                | Igniting the test specimen .....                                   | 13          |
| 8.3.1              | General .....  | 13          |
| 8.3.2              | Procedure A -- Top surface ignition .....                          | 13          |
| 8.3.3              | Procedure B -- Propagating ignition .....                          | 13          |
| 8.4                | Assessing the burning behaviour of individual test specimens ..... | 13          |
| 8.5                | Selecting successive volume fractions of oxygen .....              | 14          |
| 8.6                | Determining the preliminary volume fraction of oxygen .....        | 15          |
| 8.7                | Volume fraction of oxygen changes .....                            | 15          |
| 9                  | Calculations and expression of results .....                       | 16          |
| 9.1                | Oxygen index .....   | 16          |
| 9.2                | Determination of k .....   | 17          |
| 9.3                | Standard deviation of oxygen volume fraction measurements .....    | 17          |
| 9.4                | Precision of results .....   | 18          |

|  |  |           |
|--|--|-----------|
| <b>10</b>  | <b>Comparison with a specified minimum value of the oxygen index (short procedure)</b> ..... | <b>19</b> |
| <b>10.1</b>  | <b>General</b> .....   | <b>19</b> |
| <b>10.2</b>  | <b>Setting up the apparatus and test specimen</b> .....                                      | <b>19</b> |
| <b>10.3</b>  | <b>Igniting the test specimen</b> .....  | <b>19</b> |
| <b>10.4</b>  | <b>Assessing the burning behaviour of the test specimens</b> .....                           | <b>19</b> |
