DIN EN 17117-1:2019-02 (E)

Rubber or plastics-coated fabrics - Mechanical test methods under biaxial stress states - Part 1: Tensile stiffn ess properties

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Principle 10

5 Apparatus 10
5.1 Biaxial test equipment 10
5.2 Measurement of load 10
5.3 Measurement of strain 10

6 Sampling and preparation of test specimens 11
6.1 Bulk sample (number of pieces from a shipment or lot) 11
6.2 Number of laboratory samples 11
6.3 Specimen geometry and preparation 11
6.3.1 General 11
6.3.2 Contact strain measurement 12
6.3.3 Non-contact strain measurement 12

7 Atmosphere for conditioning and testing 12

8 Test procedure 12
8.1 Mounting of the specimen 12
8.2 Loading 12
8.3 Recording 13

9 Representation of test results 13

10 Calculation of tensile stiffnesses (tensile moduli) and Poisson's ratios 13

11 Test report 14

Annex A (informative) Examples of biaxial test equipment 15

A.1 Generality 15
A.2 Biaxial test equipment - example I 15
A.3 Biaxial test equipment - example II 16
A.4 Biaxial test equipment - example III 18

Annex B (informative) Features of a biaxial test specimen 19

B.1 Primary features of a biaxial test specimen 19
B.2 Biaxial test specimen -example with non-orthogonal yarns and extensometer layout 21

Annex C (informative) Typical profiles 22

C.1 Example of a typical load profile 22
C.2 Example of a typical strain-time plot 23
C.3 Example of a typical load-strain plot (only one of three load cycles illustrated) 23

Annex D (informative) Example methods for the determination of tensile stiffnesses (tensile moduli) and Poisson's ratios from biaxial load-strain test data 30

D.1 General 30
D.2 Method A 31
D.3 Method B 32
D.4 Method C 32
D.5 Method D 33
D.6 Method E 34
D.7 Method F 34

Annex E (informative) Determination of comparative elastic constants 36

E.1 Scope and Field of Applications 36
E.2 Symbols 36
E.3 Constitutive law used 36
E.4 Determination procedure 36

Annex F (informative) Rationale 37

Bibliography 38
