ISO 17422:2018 (E)

Plastics — Environmental aspects — General guidelines for their inclusion in standards

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Inclusion of environmental aspects in standards

- 4.1 General
- 4.2 Test method standards
- 4.2.1 General
- 4.2.2 Minimization of adverse environmental impact
- 4.2.3 Minimization of material and energy usage
- 4.3 Product standards
- 4.3.1 General
- 4.3.2 Product functionality
- 4.3.3 Environmental aspects in product standards
- 4.3.4 Renewable resources and energy
- 4.3.5 Writers of standards

Annex A (informative) Scope and limitations of life cycle assessment

- A.1 General considerations
- A.2 Subdivisions of environmental aspects
- A.2.1 Quantitative environmental aspects
- A.2.2 Qualitative environmental aspects
- A.2.3 Global aspects
- A.2.4 Regional aspects
- A.2.5 Local aspects
- A.3 Design parameters
- A.4 Plastics manufacturing and feedstock considerations
- A.5 End-of-life management
- A.6 Recyclability
- A.7 Environmentally sound material selection criteria
