ISO 6721-8:2019 (E)

Plastics — Determination of dynamic mechanical properties — Part 8: Longitudinal and shear vibration — Wave-propagation method

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Testing device

5.1 Apparatus
5.1.1 Method A: Immersion method
5.1.2 Method B: Transducer contact method
5.2 Transducers
5.3 Transit-time measurement equipment
5.4 Temperature measurement and control

6 Test specimens

6.1 General
6.2 Shape and dimensions
6.3 Preparation

7 Number of specimens

8 Conditioning

9 Procedure

9.1 Test atmosphere
9.2 Measuring the specimen dimension
9.3 Performing the test
9.3.1 Method A: Immersion method
9.3.2 Method B: Transducer contact method
9.3.3 Measurement of the specimen density
9.4 Varying the temperature

10 Expression of the results

10.1 Symbols
10.2 Determination of the longitudinal wave velocity vL
10.2.1 Method A: Immersion method
10.2.2 Method B: Transducer contact method
10.3 Determination of the transverse wave velocity vT
10.3.1 Method A: Immersion method
10.3.2 Method B: Transducer contact method
10.4 Calculation of dynamic properties
10.5 Influence of material anisotropy

11 Precision

12 Test report
