

ISO 13975:2019 (E)

Plastics — Determination of the ultimate anaerobic biodegradation of plastic materials in controlled slurry digestion systems — Method by measurement of biogas production

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Principle
5	Test and reference materials
6	Apparatus
7	Procedure
7.1	General
7.2	Preparation of inoculum
7.3	Start-up of the test
7.4	Measurement of biogas produced (see Annex A)
7.5	Test duration
7.6	Measurement of dissolved inorganic carbon (see Annex B)
8	Calculation and expression of results
8.1	Amount of biogas produced
8.2	Amount of dissolved inorganic carbon
8.3	Calculation of percentage biodegradation
9	Expression and interpretation of results
10	Validity of results
11	Test report
Annex A	(informative) Examples of test systems
Annex B	(informative) Example of apparatus for measurement of biogas dissolved in slurry
Annex C	(informative) Example of a biodegradation curve
Annex D	(informative) Table of water vapour pressures at various temperatures
